## **From Mercenaries To Market From Mercenaries To Market:**

**From Mercenaries to Market** Simon Chesterman, Chia Lehnardt, 2007-07-12 Frequently characterized as either mercenaries in modern guise or the market's response to a security vacuum private military companies are commercial firms offering military services ranging from combat and military training and advice to logistical support and which play an increasingly important role in armed conflicts UN peace operations and providing security in unstable states Executive Outcomes turned around an orphaned conflict in Sierra Leone in the mid 1990s Military Professional Resources Incorporated MPRI was instrumental in shifting the balance of power in the Balkans enabling the Croatian military to defeat Serb forces and clear the way for the Dayton negotiations in Iraq estimates of the number of private contractors on the ground are in the tens of thousands As they assume more responsibilities in conflict and post conflict settings their growing significance raises fundamental questions about their nature their role in different regions and contexts and their regulation This volume examines these issues with a focus on governance in particular the interaction between regulation and market forces It analyzes the current legal framework and the needs and possibilities for regulation in the years ahead The book as a whole is organized around four sets of questions which are reflected in the four parts of the book First why and how is regulation of PMCs now a challenging issue Secondly how have problems leading to a call for regulation manifested in different regions and contexts Third what regulatory norms and institutions currently exist and how effective are they And fourth what role has the market to play in regulation

**From Mercenaries to Market** Simon Chesterman, Chia Lehnardt, 2007-07-12 This book considers the growing importance of private military companies and efforts to regulate their activities Private actors are thought by some to be mercenaries others see them as the market's response to a security vacuum This book looks at the use of potentially lethal force by non state actors how this has differed in situations such as Sierra Leone and Iraq what rules currently constrain the behaviour of private military companies and what forces shape the development of this new market

*Dictionary of the Bible: Gennesaret, Sea of, to Market* William Smith, 1872

*The Oxford Handbook of the Use of Force in International Law* Marc Weller, Alexia Solomou, Jake William Rylatt, 2015 This Oxford Handbook provides an authoritative and comprehensive analysis of one of the most controversial areas of international law Over seventy contributors assess the current state of the international law prohibiting the use of force assessing its development and analysing the many recent controversies that have arisen in this field

**The Politics of Private Transnational Governance by Contract** A. Claire Cutler, Thomas Dietz, 2017-03-31 This edited volume provides critical reflections on the interplay between politics and law in an increasingly transnationalized global political economy It focuses specifically on the emergence and operation of new forms of governance that are developing through a variety of transnational contractual practices institutions and laws in multiple sectors and areas of economic activity Interdisciplinary in nature the volume includes contributions from law political science sociology and international politics with the focus on the political foundations of transnational contract being

both original and path breaking Placing power at the center of the analysis the volume reveals the heterogeneous landscape of contemporary law making and the different kinds of politics giving rise to this form of global ordering As the contributors note this new form of governance requires a different type of political theory and legal theory with the volume advancing understanding of the analytical theoretical and normative dimensions of private transnational governance by contract making a valuable contribution to new theory in law and politics It will be of great interest to students and academics in law political science international relations international political economy and sociology as well as international commercial arbitration lawyers trade and investment lawyers and legal firms      Hybrid Rule and State Formation Shelley Hurt, Ronnie

Lipschutz, 2015-06-26 Neoliberalism has been the reigning ideology of our era For the past four decades almost every real world event of any consequence has been traced to the supposedly omnipresent influence of neoliberalism Instead this book argues that states across the world have actually grown in scope and reach The authors in this volume contest the view that the past three decades have been marked by the diminution of the state in the face of neoliberalism They argue instead that we are witnessing a new phase of state formation which revolves around hybrid rule that is a more expansive form of state formation that works through privatization and seeks pacification and depoliticization as instrumental to enhancing state power Contributors argue that that the process of hybridization and hybrid rule point towards a convergence on a more authoritarian capitalist regime type possibly but not necessarily more closely aligned with the Beijing model one toward which even the United States with its penchant for surveillance and discipline appears to be moving This volume will shed new light on evolving public private relations and the changing nature of power and political authority in the 21st century and will be of interest to students and scholars of IPE international relations and political theory      **The Economics of War**

**in Ancient Greece** Roel Konijnendijk, Manu Dal Borgo, 2024-12-12 In recent decades the study of the ancient economy and ancient warfare have both been transformed by ground breaking new studies and methodological approaches Offering a selection of cutting edge research on the interlocked themes of economics and war this edited volume explores how armed conflict affected markets and economic opportunities in ancient Greece From the destruction of cities to the emergence of new fiscal institutions war prompted massive changes to economic conditions throughout the ancient Mediterranean and beyond some with lasting consequences for the organisation of states and armies The contributors look beyond the old paradigms of finance and logistics and broaden the discussion to address themes such as gender literary culture and the Persian Empire More specifically they analyse how ancient rulers and states struggled to mobilise resources and what they did to tackle fiscal challenges to wage war more efficiently thereby demonstrating how matters of war can be an invaluable source of information on the way ancient economies worked and developed As a result this book shows how the study of economic factors too often neglected in works on ancient warfare allows a deeper understanding of military cultures and events in ancient Greece      *Cosmopolitan War* Cécile Fabre, 2012-09-27 War is about individuals maiming and killing each

other and yet it seems that it is also irreducibly collective as it is fought by groups of people and more often than not for the sake of communal values such as territorial integrity and national self determination Cécile Fabre articulates and defends an ethical account of war in which the individual as a moral and rational agent is the fundamental focus for concern and respect both as a combatant whose acts of killing need justifying and as a non combatant whose suffering also needs justifying She takes as her starting point a political morality to which the individual rather than the nation state is central namely cosmopolitanism According to cosmopolitanism individuals all matter equally irrespective of their membership in this or that political community Traditional war ethics already accepts this principle since it holds that unarmed civilians are illegitimate targets even though they belong to the enemy community However although the traditional account of whom we may kill in wars is broadly faithful to that principle the traditional account of why we may kill and of who may kill is not Cosmopolitan theorists for their part do not address the ethical issues raised by war in any depth Fabre's *Cosmopolitan War* seeks to fill this gap and defends its account of just and unjust wars by addressing the ethics of different kinds of war wars of national defence wars over scarce resources civil wars humanitarian intervention wars involving private military forces and asymmetrical wars

**International Journal of Legal Information** ,2008      **Georgetown Journal of International Law** ,2006      *A dictionary of Greek and Roman antiquities*, ed. by W. Smith Greek antiquities,1890      **Elimination of Mercenarism in Africa** Sabelo Gumedze,2008 The aim of this monograph is to inform the revision process of the 1977 OAU AU Convention on the Elimination of Mercenarism in Africa A strong argument is made for the need for a new continental approach to deal with the new modalities of traditional mercenarism which involve an emerging and flourishing industry comprised of private military and security companies It is hoped that the ISS work on the subject of the privatisation of security will bring about a better understanding of the role of the private security sector in peacekeeping and in state and corporate security in Africa give momentum to an appropriate regulatory regime for private military sector engagement in Africa including the elimination of mercenary activity and the revision of the OAU AU Mercenary Convention and give momentum to and make inputs on the development of appropriate legislative and regulatory frameworks for the regulation of private security companies in Africa countries
