Yeo *Conservation of Dragonflies* Michael J. Samways, 2024-06-11 Dragonflies are among the most familiar and popular of all insects deeply embedded in human cultural history They are iconic and tell us much about the environments in which we and they live Their conservation is an important part of biodiversity conservation One modern dragonfly species is listed as extinct with many others currently threatened It is now essential to increase conservation efforts towards saving these threatened species with strategies now available for doing this Recovery of dragonfly populations goes hand in hand with

improvements to both freshwater conditions and bank vegetation quality In contrast some other dragonfly species have benefitted greatly from human transformation of the landscape with artificial ponds in particular increasing the population levels of many species In turn climate change is seeing many geographical range shifts Conservation of Dragonflies Sentinels for Freshwater Conservation is for naturalists citizen scientists entomologists and conservation scientists as well as practitioners and policy makers around the world Water, the Essence of Life ,1981 **Water** Catherine Barr,2022-03
