*Free Market Madness* Peter A. Ubel, 2009-01-20 Humans just aren't entirely rational creatures We decide to roll over and hit the snooze button instead of going to the gym We take out home loans we can't possibly afford And did you know that people named Paul are more likely to move to St Paul than other cities All too often our subconscious causes us to act against our own self interest But our free market economy is based on the assumption that we always do act in our own self interest In this provocative book physician Peter Ubel uses his understanding of psychology and behavior to show that in some cases government must regulate markets for our own health and well being And by understanding and controlling the factors that go into our decisions big and small we can all begin to stop the damage we do to our bodies our finances and our economy as a whole Ubel's vivid stories bring his message home for anyone interested in improving the way our society works The

Rightful Way of Banking Shahid M. K. Ghauri, Omar Masood, 2015-02-05 It has taken over five centuries for banking to evolve to its present state and the concept of interest is undoubtedly the life blood of the whole financial system Interest was religiously prohibitive for centuries in several faiths such as Buddhism and Hinduism Judaism Christianity and Islam and was also strongly opposed by neo classical economists in the 1930s Interest riba is still outlawed in Islam with the term riba eater being one of the cruellest insults Islamic scholars have explained that the current practice of contracts without interest is a result of following the jurisprudence laid in the Quran and Sunnah of Prophet Mohammad sallallahu alayhi wa sallam As such this mode of banking and finance without riba is recognised as Islamic banking This name has often been criticised by scholars as there is no philosophy of banking in Islamic teachings Consequently some of the banks that follow these regulations have adopted other names such as savings banks and finance houses This book explains the philosophies behind the current trend in riba free banking which is implemented as Islamic banking around the world The book is divided into five sections the first of which is related to the introduction of riba free banking The second is related to the fundamentals concepts and beliefs of riba free banking organisations while the third differentiates between two streams of financial models The fourth section explains risk management in riba free banking while the final section discusses international institutions related to the riba free financial system The book also contains a glossary of terms related to riba free banking and a terms index for reader's ease in academic study **Markets, Unemployment and Economic Policy** Philip Arestis, Gabriel
