Global Justice and International Economic Law Frank J. Garcia, 2013-04-15 For centuries international trade has been seen as essential to the wealth and power of nations More recently we have started to understand its problematic role as an engine of distributive justice In this compelling book Frank I Garcia proposes a new way to evaluate construct and manage international trade one that is based on norms of economic justice comparative advantage and national interest Garcia examines three ways to conceptualize the problem of trade and global justice drawn from Rawlsian liberalism communitarianism and consent theory These approaches illustrate specific issues of importance to the way global justice has been theorized offering a pluralistic mode of arguing for global justice and highlighting the unique modes of discourse we employ when engaging with global justice and their implications for conceptualizing and arguing the problem Garcia suggests a new direction for trade agreements built around truly consensual trade negotiations and the kind of international economic system they would structure Global Justice and International Economic Law Frank J. Garcia, 2013-04-15 For centuries international trade has been seen as essential to the wealth and power of nations More recently we have started to understand its problematic role as an engine of distributive justice In this compelling book Frank I Garcia proposes a new way to evaluate construct and manage international trade one that is based on norms of economic justice comparative advantage and national interest Garcia examines three ways to conceptualize the problem of trade and global justice drawn from Rawlsian liberalism communitarianism and consent theory These approaches illustrate specific issues of importance to the way global justice has been theorized offering a pluralistic mode of arguing for global justice and highlighting the unique modes of discourse we employ when engaging with global justice and their implications for conceptualizing and arguing the problem Garcia suggests a new direction for trade agreements built around truly consensual trade negotiations and the kind of international economic system they would structure Emerging Powers, Global Justice and International Economic Law Andreas Buser, 2021-01-04 The book assesses emerging powers influence on international economic law and analyses whether their rhetoric of reforming this unjust order translates into concrete reforms The questions at the heart of the book surround the extent to which Brazil Russia India China and South Africa individually and as a bloc BRICS provide alternative regulatory ideas to those of Western States and whether they are able to convert their increased power into influence on global regulation To do so the book investigates two broader case studies namely the reform of international investment agreements and WTO reform negotiations since the start of the Doha Development Round As a general outcome it finds that emerging powers do not radically challenge established law Third World rhetoric mostly does not translate into practice and rather serves to veil economic interests Still emerging powers provide for some alternative regulatory ideas already leading to a diversification of international economic law As a general rule they tend to support norms that allow host States much policy space which could be used to protect and fulfil socio economic human rights especially but not only in the Global South

Research Handbook on Global Justice and International Economic Law John Linarelli, 2013-09-30 The fairness of institutions of global economic governance ranks among the most pressing issues of our time **Global Justice and** International Economic Law Chi Carmody, Frank J. Garcia, John Linarelli, 2012-01-09 Since the beginnings of the GATT and the Bretton Woods institutions and on to the creation of the WTO states have continued to develop institutions and legal infrastructure to promote global interdependence International lawyers are experts in understanding how these institutions operate in practice but they tend to uncritically accept comparative advantage as the principal normative criterion to justify these institutions In contrast moral and political philosophers have developed accounts of global justice but these accounts have had relatively little influence on international legal scholarship and on institutional design This volume reflects the results of a symposium held at Tillar House the American Society of International Law headquarters in Washington DC in November 2008 which brought together philosophers legal scholars and economists to discuss the problems of understanding international economic law from the standpoints of rights and justice in particular from the standpoint of The Holy See, Social Justice, and International Trade Law Rev. Dr. Alphonsus Ihuoma, 2018-06-30 The distributive justice Holy See Social Justice and International Trade Law Assessing the Social Mission of the Catholic Church in the GATT WTO System highlights the uniqueness of the Catholic Church as the foremost institution in the world that can confront issues in world trade that affect the common good The distinguished author Rev Dr Alphonsus Ihuoma provides a superbly broad and deep examination that is both scholarly and practical of the mission of the Catholic Church in the world as one that centers on the temporal and eternal needs of humanity His discussion treats thoughtfully the mediatory role of the church in world affairs and argues persuasively that the church has been engaged in this role since its very beginning even before nations embraced organized politics two thousand years ago This remarkable book is a great tool for any reader seeking to know more about the unique position of the church in world affairs especially in the GATT WTO system The book rightly lauds the churchs achievements in history But it equally and rightly argues that the church must do more to address present challenges in the world trading system Readers will be enlightened by the treatment of the failures of the GATT WTO system in pursing the objectives for which it was established the churchs efforts to pursue vital related objectives and the need for European Yearbook of International Economic Law 2015 Christoph Herrmann, Markus her to do more Krajewski, Jörg Philipp Terhechte, 2015-07-04 This sixth volume 2015 of the European Yearbook of International Economic Law puts a particular emphasis on non tariff barriers NTBs to trade and the world trade order With the steady reduction of tariff rates since the GATT 47 came into force focus in recent years has been on the vast and complex landscape of non tariff barriers to trade States as well as scholars seemingly struggle with the multitude of measures pooled under this expression as there is no single acknowledged definition of the term and its relation to the term non tariff measures remains equally blurred Particularly in practice and on a multilateral level there appears to be some awkwardness when it comes to coping

with NTBs since multilateral trade rules seem to be in conflict with national regulatory autonomy in the pursuit of policy objectives In part one this volume sheds light on the problems of non tariff barriers to trade that arise in various fields Part two focuses on regional integration with an emphasis on relations between East Asia and the European Union In this regard the authors outline the trade and investment relations between the European Union and East Asia including Japan Korea and Singapore Part three offers an overview of recent institutional developments in WIPO ICSID WTO and WTO jurisprudence Part four includes book reviews of recent works in the field of international economic law and part five introduces a new section on publications in the field of international economic law that were released in 2013 and 2014 Religious Reflection on the Rise of Economic Inequality Kate Ward, Kenneth Himes, 2019-01-24 This book is a printed edition of the Special Issue Growing Apart Religious Reflection on the Rise of Economic Inequality that was published in Global Justice and International Economic Law Chi Carmody, Frank J. Garcia, Professor of Law and Legal Theory and Head of School John Linarelli, 2014-05-14 Global justice is one of the most important subjects in law and political theory today What principles of justice might tell us about the actual practices of the WTO and other international economic institutions is of vital importance to states and their citizens This volume reflects the results of a symposium held at Tillar House the ASIL headquarters in Washington DC in November 2008 which brought together philosophers legal scholars and economists to discuss the problems of understanding international economic law from the standpoint of rights justice and economic efficiency. The book makes advances in developing the normative criterion for ecaluation and justifying the international economic legal order The Georgia Journal of **International and Comparative Law** ,2014 Social Theory and Practice ,2018 Michigan Law Review ,2017-04 Current Law Index ,2007 Global Justice ,1993 Theories of Justice and International Economic Law Frank J. Garcia, Lindita V Ciko, 2013 In this paper we examine the essential and increasingly recognized relationship between theories of justice and international economic law As international economic law institutions have increased in number and power and the stark figures of global poverty prove stubbornly persistent justice is becoming a central element in globalization and global justice debates International economic law and its institutions are powerful engines of resource allocation between states and within states among various groups firms and individuals We identify three questions that will help clarify the scope and nature of this relationship First theories of justice can help us determine the proper objective of international economic law and policy Second theories of justice can help us evaluate whether or not international economic law as a whole and specific treaties rules and institutions are fair or unfair according to our various competing understandings of such principles Finally theories of justice can help us evaluate whether international economic law institutions are legitimate

Globalization / Anti-Globalization David Held,Anthony McGrew,2007-11-19 Is globalization being eclipsed by a resurgent geopolitics Does the war on terror denote the end of globalization or a new phase of militarized globalization Empire or globalization are these the right terms to describe the current global order The second edition of this highly successful book tests the claims of those who dismiss the continuing significance of globalization through a comprehensive assessment of contemporary global trends In the aftermath of 9 11 and the war in Iraq there has been much talk of the end of globalization Held and McGrew argue that these post mortems for globalization are entirely premature They show this by focusing upon the primary structures of world order namely patterns of governance organized violence the economy culture and environmental degradation Patterns of inequality exclusion and domination are also assessed Building upon this analysis the authors present the case for continuing to take globalization seriously as both a description and explanation of our current global condition They also ask the vital question can globalization be tamed Held and McGrew explore whether a more just and stable world order is either desirable or feasible and present an alternative ethical and political agenda for the twenty first century a global covenant of cosmopolitan social democracy The second edition of this powerful and original book has been comprehensively updated with three new chapters added The book will appeal to all those who remain intrigued confused or simply baffled by the controversy about globalization and its consequences for the twenty first century world order
