The other person, wearing a yellow shirt, is also writing on a document with a black pen. There are two laptops on the table, one open and one closed. Several pens and pencils are scattered on the table. The background is a plain, light-colored wall.

Dobson Keele University UK This collection of provocative essays re evaluates the worlds failed policy responses to climate change in the process demonstrating how cosmopolitan ethics can inform global environmental governance A cosmopolitan worldview points to climate related policies that are less international and more global From a cosmopolitan perspective national borders should not delineate obligations and responsibilities associated with climate change Human beings rather than the narrow interests of nation states ought to be at the centre of moral calculations and policy responses to climate change In this volume expert contributors examine questions of individual and global responsibility burden sharing among people and states international law and environmental justice capitalism and voluntary action pluralist cooperation and hegemony and alternative approaches to climate action and diplomacy The book helps to illuminate new principles for global environmental policy that can come from cosmopolitan conceptions of climate change
