

A Timeline of Global Risks 2022

When Will These Major Global Threats Become a Serious Problem Worldwide?

Each year, the World Economic Forum releases its Global Risks Report, which highlights the top risks that pose a threat to the world in the next decade.

1 Out of 10 risks, respondents were asked to identify which risks they believe will become a critical threat to the world, and when.

Vaccine access is still highly uneven around the world, leaving developing countries more vulnerable to new waves of COVID-19 infection.

Competition between the U.S. and China is rising. The U.S. is threatened by China's strong military presence and is tightening alliances with other world powers (the UK and Australia) as a result.

Even the new commitments made at the 2021 COP26 aren't enough to achieve the 1.5°C warming goal established in the 2016 Paris Climate Agreement—meaning, we're at great risk of climate collapse.
