Globalisation Agriculture And Development Perspectives From The Asia Pacific:

Globalisation, Agriculture and Development Matthew Tonts, Muhammed Abu B. Siddique, 2011-01-01 This book explores the links between globalization agriculture and development in a number of contemporary Asia Pacific nations It highlights the complex and diversified nature of agricultural change in these contexts and the ways in which this shapes patterns of economic and social development Globalisation Agriculture and Development shows that while agriculture continues to play an important role in local regional and national development both the industry and the communities it supports are facing an increasing number of economic social and environmental challenges Megacities and the Coast Mark Pelling, Sophie Blackburn, 2014-01-03 Based on a major international study this volume provides a synthesis of scientific knowledge on megacity urbanization on the coast environmental impacts risks and management choices including a focus on adaptation mitigation and disaster risk management It is the primary output of a major international scientific project sponsored by the International Geosphere Biosphere Programme the Land Ocean Interactions at the Coastal Zone programme of IHDP IGBP and others It brings together the work of over 60 contributing authors and an international review board It presents the international policy and academic community with an unbiased and high quality assessment of the state of the art in areas of social ecological systems interaction One of its main messages is that while we know a great deal about megacities of more than ten million people and about urban processes and about coasts and their physical and ecological processes aquatic physical and atmospheric there is relatively little work that focusses primarily at points of intersection between large scale urbanization and the coast The book responds to this gap by providing the first global synthesis of megacity and large urban region urbanization on the coast Its focus is on environmental and development challenges climate change and disaster It is interdisciplinary and brings together world recognised scientists including many IPCC lead authors on urban climate and atmosphere disaster risk management demography and coastal environments **China's Agricultural Investment in Australia** Michaela Boehme, 2024-10-25 This book critically examines the driving forces discourses and conflicts surrounding Chinese investments in overseas farmland with a specific focus on Australia With growing amounts of finance channeled into the purchase of overseas food and farming assets China has become a frontrunner in the global land rush Unlike much of the existing literature that focuses on emerging economies such as Brazil or Africa this book examines Chinese farmland purchases in the developed country context of Australia Based on four years of extensive field work in Australia and China it traces the encounters and interactions between investors regulators deal brokers farmers and eaters that shape the ways in which individual Chinese investment projects materialize in the Australian countryside In contrast to conventional wisdom portraying China's overseas land rush as a state led strategy to feed the Chinese population this book reveals that Chinese investments in Australian farmland have been propelled by the intersecting interests of international finance and business elites looking to cash in on booming Chinese demand for high

quality Western food products This book provides a unique transnational perspective on China's overseas farmland purchases and shows how Chinese farmland investments produce uneven geographies of agri food globalization that cut across national borders Through the lens of China's agri engagement in Australia this book advances our theoretical understanding of the new types of power relations and dynamics shaping an increasingly multi polar agri food system This book will be useful to students and scholars of agri food studies Chinese studies and globalization with an interest in the global land rush and the shifting contours of the global agri food system

Regional Resilience, Economy and Society Christine Tamásy, Javier Revilla Diez, 2016-04-08 There has been a great deal of restructuring of rural places and communities under globalisation highlighting the interaction of local and global actors to produce new hybrid socio economic relations Recent research highlights the heterogeneity of globalisation in which rural places are different to each other but also different to how they were in the past Bringing together an interdisciplinary team of academics and comparative case studies from Europe West and East and Asia this book explores and discusses opportunities and challenges associated with globalising rural places and identifies possibilities for policy and practical intervention by rural development actors Special attention is paid to multi scalar processes through which rural places are reshaped through globalisation Taking a geographical approach the book produces new critical work on the interdependence between globalisation and rural spaces It is organised into five sections Part I focuses on Global Rural Linkages showing the multifaceted interrelation between actors at different geographical scale and demonstrating that globalisation is not only external to rural spaces Part II on Rural Entrepreneurship and Labour Markets explores the potential of business start ups in rural spaces which are not only necessity driven Part III Rural Innovation and Learning shows that rural places are also places for innovation and learning Part IV on Rural Policies and Governance argues that regional policies for rural places should promote side activities to maintain social capital and that regional policy should take a more integrative perspective between urban and rural spaces in order to explore complementary development paths The concluding chapter New Approaches to Rural Spaces discusses new approaches to globalising rural places in relation to the preceding chapters published in this book

Food and Society Amy E. Guptill, Denise A. Copelton, Betsy Lucal, 2013-04-03 This timely and engaging text offers students a social perspective on food food practices and the modern food system It engages readers curiosity by highlighting several paradoxes how food is both mundane and sacred reveals both distinction and conformity and in the contemporary global era comes from everywhere but nowhere in particular With a social constructionist framework the book provides an empirically rich multi faceted and coherent introduction to this fascinating field Each chapter begins with a vivid case study proceeds through a rich discussion of research insights and ends with discussion questions and suggested resources Chapter topics include food's role in socialization identity work health and social change as well as food marketing and the changing global food system In synthesizing insights from diverse fields of social inquiry the book addresses issues of culture structure and social inequality

throughout Written in a lively style this book will be both accessible and revealing to beginning and intermediate students alike

The Routledge Companion to Rural Planning Mark Scott, Nick Gallent, Menelaos Gkartzios, 2019-01-15 The Routledge Companion to Rural Planning provides a critical account and state of the art review of rural planning in the early years of the twenty first century Looking across different international experiences from Europe North America and Australasia to the transition and emerging economies including BRIC and former communist states it aims to develop new conceptual propositions and theoretical insights supported by detailed case studies and reviews of available data The Companion gives coverage to emerging topics in the field and seeks to position rural planning in the broader context of global challenges climate change the loss of biodiversity food and energy security and low carbon futures It also looks at old established questions in new ways at social and spatial justice place shaping economic development and environmental and landscape management Planning in the twenty first century must grapple not only with the challenges presented by cities and urban concentration but also grasp the opportunities and understand the risks arising from rural change and restructuring Rural areas are diverse and dynamic This Companion attempts to capture and analyse at least some of this diversity fostering a dialogue on likely and possible rural futures between a global community of rural planning researchers Primarily intended for scholars and graduate students across a range of disciplines such as planning rural geography rural sociology agricultural studies development studies environmental studies and countryside management this book will prove to be an invaluable and up to date resource
