Globalisation Domestic Politics And Regionalism Routledgewarwick Studies In Globalisation 5:

Microregionalism and Governance in East Asia Dr. Katsuhiko Sasuga, Katsuhiko Sasuga, 2004-10-28 This book provides an analysis of the processes of micro regionalization in East Asia within the broader context of globalization and regionalization. The author examines the specifics of corporation production and investment networks that link parts of Japan, Taiwan and China with a detailed case study focusing on the electronics industry. Making a significant contribution to the research on regionalism and multi level governance in East Asia, this book will appeal to those interested in international political economy and Asian studies.

Asia's New Institutional Architecture Vinod K. Aggarwal, Min Gyo Koo, 2008-02-04 Can regional and interregional mechanisms better institutionalize the creasing complexity of economic and security ties among states in Nor east Southeast and South Asia. As the international state system und goes dramatic changes in both security and trade relations in the wake of the Cold War s end the Asian financial crisis and the attacks of Sept ber 11 2001 this question is now of critical importance to both academics and policymakers. Still little research has been done to integrate the ana sis of both regional security and economic dynamics within a broader c text that will give us theoretically informed policy insights. Indeed when we began our background research on the origin and e lution of Asia s institutional architecture in trade and security we found that many scholars had focused on individual subregions whether Nor east Southeast or South Asia. In some cases scholars examined links tween Northeast and Southeast Asia and the literature often refers to these two subregions collectively as Asia artificially bracketing South Asia. Of course we are aware that as products of culture economics history and politics the boundaries of geographic regions change over time. Yet the rapid rise of India and its increasing links to East Asia especially those formed in the early 1990s suggest that it would be fruitful to examine both developments within each subregion as well as links across subregions.

The Evolution of Regionalism in Asia Heribert Dieter, 2007-12-10 By combing the analysis of the three dimensions of integration this book enables readers to gain a broad understanding of the theory and practice of integration processes in Asia.

Regional Integration in East Asia and Europe Bertrand Fort, Douglas Webber, 2006-06-19 No existing book provides a systematic description and explanation of the differences and similarities in regional integration levels and processes in Europe and East Asia. Apart from also providing a comprehensive issue based overview of political integration in the past and present in the two regions the volume provides a useful reality check to integration theorists who have developed their theories based exclusively or largely on the analysis of the European case. Brings together the top scholars on regionalism in Europe and Asia.

Globalisation and Poverty Maurizio Bussolo, Jeffery I Round, 2005-10-10 The consequences of globalization for the world's poor are uncertain and fierce rhetoric is dividing its supporters and detractors The channels of effect of essentially macroeconomic shocks on the microeconomic position of individuals and households in poor countries are many and various This book addresses three core issues 1 what are the main channels of effect 2 what are the lessons to be learned from policy measures to alleviate negative poverty consequences and 3 do the proposed analytical approaches assist in providing a monitoring capability This volume assesses the more easily quantifiable effects resulting from price and quantity responses in the goods and labour markets It includes studies of Colombia Ghana India Nepal Bangladesh and Vietnam It uses key analytical approaches most of which are based on numerical simulation methods employing models with different levels of complexity These models capture the features of an economy how it functions and how it might respond to globalization shocks The most important collective contribution of the authors is their establishment of directions and magnitudes of effect based on empirical evidence

Globalising Democracy Peter J. Burnell, 2006 Explores the intersection of two major themes globalization and the contribution that both domestic party politics and international party support make to democratization This volume shows what globalization means for domestic and international efforts to build effective political parties and competitive party systems in emerging democracies
