Globalization And The Perceptions Of American Workers Author Matthew J Slaughter Mar 2001:

Job Loss from Imports Lori G. Kletzer, 2001 In this study of the medium term effects of trade displacement on American workers Kletzer uses worker level data from the US Displaced Worker Surveys to examine the pattern of reemployment following trade related job loss She also analyzes regional and local labor market variations and concludes by exploring the implications of her findings for US policy on linking the labor market and international trade *Why Global Commitment Really Matters!* Howard Lewis, J. David Richardson, 2001 For firms both large and small global integration usually has a very positive impact This work explores new gains from deep international integration The authors supplement their research with real life profiles of representative American exporters importers investors abroad and others *The Foreign Policy Discourse in the United Kingdom and the United States in the "New World Order"* Lori Maguire, 2009-01-14 The goal of this book is to examine some of the major foreign policy debates in the United Kingdom and the United States in the period from 1992 to 2008 from the end of the Cold War and the aftermath of the first Gulf War to the 2008 American presidential election The first President Bush spoke in 1991 of a new world order which seemed to mean an American hegemony The United States was now the world's only superpower although a superpower afflicted with weaknesses especially economic ones But by 2008 the new world order did not seem so new or so strongly American The period saw the terrorist attacks against the US of 11 September 2001 military problems for the superpower in Afghanistan and Iraq and by the summer of 2008 near economic collapse In all of these developments Britain shared to a lesser or a greater extent It is hoped that this book will shed an important light both on each nation and on the so called special relationship between the two Furthermore this book is also not specifically concerned with policy or how policy is made but with the debate around policy and the rhetoric used to present different points of view The Special Relationship between the US and Britain remains an enigmatic ever changing but still very powerful factor in world politics As an examination of their foreign policy discourses reveals from the perspective of culture and values few Western countries are as different as the United Kingdom and the US With very few exceptions the foreign policies of Gladstone and Tony Blair and Churchillian rhetoric unmatched by his supremely realpolitical politics British governments abhor talking about values and ideals The British cultural peculiarity is to dismiss ideology and values as packaging only to be caught by surprise time and again that they cannot do business with Herr Hitler or that people kill each other for their values religions constructed identities and ideologies Most American governments by contrast have had ideological and moral crusades embroidered on their banners in their foreign policy There is a convergence with Britain when both proclaim that all they are doing is in their self interest but the Americans unashamedly assume that what is good for America is good for the world while the British discourse with the UK's decline since 1945 rarely goes that far As an analysis of their discourses reveals the Special Relationship is thus clearly founded on something either deeper or more superficial than shared culture or values this volume sheds light on this surprising fact in most

illuminating ways and Lori Maguire's achievement in bringing together these examinations is praiseworthy indeed Prof Beatrice Heuser University of Reading Globalization and the Perceptions of American Workers Kenneth F.

Scheve, Matthew Jon Slaughter, 2001 Recent research suggests that globalization has placed considerable pressure on lower skilled US workers In this study the authors draw on data and surveys to examine the measurable and the perceived effects of US engagement with the world on American workers As globalization comes under evergrowing scrutiny from all sides this book should be of great interest to policymakers researchers and students **The Effect of Globalization on Wages in**

the Advanced Economies Matthew J. Slaughter, Phillip Swagel, 2008 Increased globalization the international integration of markets for goods factors and technology has coincided in the past two decades with a shift in labor demand away from less skilled workers toward those with more skills This shift in labor demand has produced a widening of the gap in wages between the two groups of workers along with rises in income inequality and unemployment primarily among low skilled workers This paper summarizes research on the connection between globalization and labor markets in the advanced economies Much of the concern about the effects of globalization has focused on the impact of imports from developing countries on wages employment and income inequality However the consensus of empirical research is that increased trade accounts for only about 10 to 20 percent of the changes in wages and income distribution in the advanced economies The more important influence on labor markets in the 1980 s and 1990 s has been a technology driven shift in labor demand away from less skilled workers and towards more skilled workers This has resulted in increased wage inequality in some countries and in lower relative employment among unskilled workers in others Increased capital mobility including the outsourcing of production to low wage countries as well as immigration from developing countries to the advanced economies appear to have had only modest effects on labor markets in the advanced economies Nonetheless increased globalization can increase the sensitivity of wages and employment to external shocks and thereby contribute to increased job insecurity Moreover the burden of adjusting to changes in the global economy falls most heavily on low skilled workers Policymakers must keep in mind potential social dislocations from these changes and ensure that those who are displaced do not become marginalized It is important however that any policy actions do not impede adjustment but rather provide incentives for workers and firms to adjust to and therefore gain from changes in the global economic environment
