Gender and Conversion Narratives in the Nineteenth Century Kirsten Rüther, Angelika Schaser, 2016-03-03 Addressing an important social and political issue which is still much debated today this volume explores the connections between religious conversions and gendered identity against the backdrop of a world undergoing significant social transformations Adopting a collaborative approach to their research the authors explore the connections and differences in conversion experiences tracing the local and regional rootedness of individual conversions as reflected in conversion narratives in three different locations Germany and German missions in South Africa and colonial Australia at a time of massive social changes in the 1860s Beginning with the representation of religious experiences in so called conversion narratives the authors explore the social embeddedness of religious conversions and inquire how people related to their social surroundings and in particular to gender order and gender practices before during and after their conversion With a concluding reflective essay on comparative methods of history writing and transnational perspectives on conversion this book offers a fresh perspective on historical debates about religious change gender and social relations

Globalization Jürgen Osterhammel, Niels P. Petersson, 2005 Globalization has become a popular buzzword for explaining today's world The expression achieved terminological stardom in the 1990s and was soon embraced by the general public and integrated into numerous languages But is this much discussed phenomenon really an invention of modern times In this work Jürgen Osterhammel and Niels Petersson make the case that globalization is not so new after all Arguing that the world did not turn global overnight the book traces the emergence of globalization over the past seven or eight centuries In fact the authors write the phenomenon can be traced back to early modern large scale trading for example the silk trade between China and the Mediterranean region the shipping routes between the Arabian Peninsula and India and the more frequently traveled caravan routes of the Near East and North Africa all conduits for people goods coins artwork and ideas Osterhammel and Petersson argue that the period from 1750 to 1880 an era characterized by the development of free trade and the long distance impact of the industrial revolution represented an important phase in the globalization phenomenon Moreover they demonstrate how globalization in the mid twentieth century opened up the prospect of global destruction though nuclear war and ecological catastrophe In the end the authors write today's globalization is part of a long running transformation and has not ushered in a global age radically different from anything that came before This book will appeal to historians economists and anyone in the social sciences who is interested in the historical emergence of globalization

Nester,2010-11-14 How did globalization come to dominate our lives What have been are and most likely will be globalization s potential benefits and costs This book explores the world s most powerful force for good and evil from the Renaissance through today and beyond **Globalization** Manfred B. Steger,2017 Globalization is one of the defining buzzwords of our time describing a variety of accelerating economic political and cultural processes that constantly change our experience of the world The fourth edition of this Very Short Introduction provides an exploration of both the causes and effects of the phenomenon Globalization: A Very Short Introduction Manfred Steger,2013-04-04 Rather than forcing such a complex social phenomenon into a single conceptual framework Manfred Steger presents globalization in plain readable English as a multifaceted process encompassing global regional and local aspects of social life **A Global History of Globalization**

Andrea Colli,2018-03-22T00:00:00+01:00 The world s history is a history of global events Events which shaped the making of the present If you want to understand the present you need to study history and to study it in depth sorry This book is about the making of today It is a compelling narrative of the origins of all what worries our present instability disequilibrium fear and uncertainty It is the narrative of the fragility but also of the strength of modern civilization so great and so scary so fascinating and so repulsive **Globalisation In World History** A G Hopkins,2011-02-22 Globalisation was the buzzword of the 1990s it promises to become even more important in the first decade of the new century There is now a flood of literature on the economics politics and sociology of globalization and regular commentary in the serious daily and weekly press Virtually all of this discussion makes assumptions and frequently explicit claims about the novelty of globalisation According to one view the globalisation is a new phenomenon that can be dated from the 1980s A second view holds that globalisation has a long history that can be traced back to the nineteenth century if not earlier The importance of these themes scarcely needs elaborating Yet they have still to attract significant attention from historians This volume is the first by a team of historians to address these issues Globalisation in World History has two distinctive features First it offers a

categorisation of types and stages of globalisation that existed before the late twentieth century No such taxonomy exists at present Secondly it emphasises a feature that the current debate greatly underestimates the fact that globalisation has non Western as well as Western origins Globalisation is much more than the rise of the West presented in new terminology The contributors bring their expertise to bear on themes that give prominence to China South Asia Africa and the world of Islam as well as to Europe and the United States and span the last three centuries while also showing an awareness of more distant antecedents The result is a coherent and thought provoking collection of essays Globalisation will become a major theme of historical research during the next decade this book will help to set the new agenda

A Big History of Globalization

Julia Zinkina, David Christian, Leonid Grinin, Il'ia Viacheslavovich Il'in, Aleksei Andreev, Ivan Aleshkovski, Sergey Shulgin, A. V. Korotaev, 2019 This book presents the history of globalization as a network based story in the context of Big History Departing from the traditional historic discourse in which communities cities and states serve as the main units of analysis the authors instead trace the historical emergence growth interconnection and merging of various types of networks that have gradually encompassed the globe They also focus on the development of certain ideas processes institutions and phenomena that spread through those networks to become truly global The book specifies five macro periods in the history of globalization and comprehensively covers the first four from roughly the 9th 7th millennia BC to World War I For each period it identifies the most important network related developments that facilitated or even spurred on such transitions and had the greatest impacts on the history of globalization By analyzing the world system's transition to new levels of complexity and connectivity the book provides valuable insights into the course of Big History and the evolution of human societies

Globalization in World History Peter N. Stearns, 2016 Globalization in World History examines major changes in global interactions from 1000 CE onward and defines four major turning points that have accelerated the process of globalisation It argues that although the term is a relatively new one the process of globalisation has roots much further back in time

Globalization William R. Nester, 2010 International politics began with the emergence of the first organized states thousands of years ago Global politics is more recent it appeared about five centuries ago when the European powers began to mesh the world's far corners together through conquest and trade Today we live on a planet characterized by globalization or the ever more complex economic cultural technological and environmental interdependence among all people everywhere Until recently globalization's development was slow Although countries increasingly traded allied and negotiated with each other the divisions among them far outweighed the ties and nations often settled their conflicts with war or the threat of war However since 1945 despite or more likely because of the Cold War globalization has developed rapidly and profoundly Today all humans are formally tied to all others through their country's membership in the United Nations and numerous other international organizations along with the immediate benefits of global trade telecommunications travel and the internet Yet globalization has a dark side it destroys as well as creates jobs wealth and lives while every human lives under

the shadow of potential nuclear and ecological extinction How did humanity reach a stage of history so filled with such an array of prospects and perils Globalization A Short History of the Modern World explores that all powerful force for good and evil from the Renaissance through today and beyond A Brief History of Globalization Alex MacGillivray,2006 By identifying successive waves of globalization from 15th century explorations to the European trading empires of the 19th century from the construction of the Great Wall of China to the fall of the Berlin Wall the author opens the lid on the complex economics behind the controversies of globalisation *Globalization* Habibul Haque Khondker,2001
