Mémoires sauvées des glaces Claude Lorius, 2016-04-20 Héros du film La Glace et le Ciel Claude Lorius voue dans ce livre sa carrière de glaciologue L'aventure commence en 1955 par une petite annonce à la faculté de Besançon On recherche des jeunes gens en bonne santé et ne craignant pas la solitude Il ne se doute pas alors qu'il va participer à la plus grande aventure scientifique jamais entreprise sur le continent antarctique Depuis le premier hivernage à la base Charcot en 1956 Claude Lorius a participé plus de vingt expéditions polaires dont la dernière en 1984 Vostok station russe où la température peut descendre en dessous de 80 °C C'est en terre Adélie qu'il fait l'une des plus incroyables découvertes en observant dans son whisky les bulles de gaz libérées par le glaciologue d'une carotte profonde Il a l'intuition que ces bulles contiennent le secret des temps immémoriaux où elles ont été emprisonnées Vingt ans plus tard la confirmation de ce pressentiment fera la une de la prestigieuse revue Nature les activités humaines sont la cause du réchauffement climatique actuel Les découvertes scientifiques de Claude Lorius sont des clés pour la compréhension des variations du climat mais sa vie est avant tout une grande aventure en Antarctique Glaciologie Claude Lorius, 1964 **Cineforum**, 2015 *Livres hebdo*, 1991 La Librairie française, 1970 Planète blanche Jean Jouzel, Claude Lorius, Dominique Raynaud, 2008-05-22 Depuis les premières explorations du XXe siècle la glaciologie est devenue une science partiellement une science cruciale même puisque c'est elle qui permet de suivre l'histoire du climat sur des milliers d'années Les auteurs de ce livre sont même l'origine d'une première ce sont eux qui en 1987 ont démontré que les variations de la température sont liées à la teneur de l'atmosphère en gaz effet de

serre Alors que s'ouvre l'Année polaire internationale ce livre est d'abord un passionnant voyage travers ce qu'on peut appeler la Planète blanche du Groenland l'Antarctique en passant par les glaciers des pays tempérés Il retrace les expéditions et les expériences qui ont permis de mieux comprendre le monde des glaces C'est surtout une pièce essentielle dans le débat autour du changement climatique Quel climat demain Voici ce que nous disent les glaces Médaille d'or 2002 du CNRS Jean Jouzel est directeur de l'Institut Pierre Simon Laplace directeur de recherche au CEA et l'un des membres français du GIEC qui a reçu le prix Nobel de la paix 2007 Médaille d'or 2002 du CNRS membre de l'Académie des sciences Claude Lorius est directeur de recherche maître du CNRS au Laboratoire de glaciologie et de géophysique de l'environnement qu'il a créé à Grenoble Il a notamment publié Les Glaces de l'Antarctique Dominique Raynaud est directeur de recherche au Laboratoire de glaciologie et de géophysique de l'environnement de Grenoble et l'un des membres français du GIEC qui a reçu le prix Nobel de la paix 2007 Glaces de l'Antarctique Claude Lorius, 1993
