A Companion To Interdisciplinary Stem Project-Based Learning Mary Margaret Capraro, Robert Capraro, 2016-07-18 This text contains 25 Project Based Learning PBL lessons written by a combination of undergraduate preservice teachers inservice teachers and graduate students Everyone who wrote a chapter strives to improve STEM education to help others implement standards based STEM instruction that takes learning in isolation to greater accountability through integrated and meaningful tasks that answer the question every teacher dreads When am I going to use this The PBLs were written to implement in middle and high school classrooms All of them are interdisciplinary in nature We have divided them into six themes construction and design water environment mixtures technology nutrition and genetics Each lesson contains a schedule at a glance and the well defined outcome so you can quickly see how a particular PBL fits into your curriculum Objectives are listed along with STEM connections written as objectives We have included all materials needed and then each day of activities including an imbedded engagement exploration explanation evaluation including rubrics and extension We have tried to include everything necessary for successful implementation This practical book is the perfect companion to the handbook for learning about implementing PBLs Project Based Learning An Integrated Science Technology Engineering and Mathematics STEM Approach second edition Advances in The Human Side of Service Engineering Tareq Z. Ahram, Waldemar Karwowski, 2016-07-26 This book explores the different ways in which human factors engineering influences organizations and enterprises well being and competitiveness It covers a wealth of interrelated topics such as service engineering service science human computer interaction service usability attitude and opinion assessment servicescape design and evaluation and training for service delivery Further topics include service systems modeling anthropology in service science and customer experience as well as ethical issues and the impact of an aging society Based on the AHFE 2016 International Conference on The Human Side of Service Engineering held on July 27 31 2016 in Walt Disney World Florida USA the book provides readers with a comprehensive general view of current research and challenges in the important field of service engineering It also provides practical insights into the development of services for different kinds of organizations including health care organizations aviation providers manpower allocation hospitality and entertainment as well as banking and financial institutions Localization and Quality Assessment of Project-Based Learning in China Xuemei Xia, 2025-09-17 This book provides a systematic assessment of the quality of Project Based Learning PBL and proposes a diagnostic criteria framework for evaluating project design and implementation It identifies key characteristics that vary as a result of differentiation The book offers a feasible framework for implementing competency based teaching on an international scale drawing from our long term exploration in China to address shortcomings in Chinese education Furthermore it delineates the boundaries and limitations of project based design facilitating professional learning in its implementation Educational practitioners will gain multidimensional perspectives to develop their capacities

Data Information Literacy Jake Carlson, Lisa R. Johnston, 2015-01-15 Given the increasing attention to managing publishing and preserving research datasets as scholarly assets what competencies in working with research data will graduate students in STEM disciplines need to be successful in their fields And what role can librarians play in helping students attain these competencies In addressing these questions this book articulates a new area of opportunity for librarians and other information professionals developing educational programs that introduce graduate students to the knowledge and skills needed to work with research data The term data information literacy has been adopted with the deliberate intent of tying two emerging roles for librarians together By viewing information literacy and data services as complementary rather than separate activities the contributors seek to leverage the progress made and the lessons learned in each service area The intent of the publication is to help librarians cultivate strategies and approaches for developing data information literacy programs of their own using the work done in the multiyear IMLS supported Data Information Literacy DIL project as real world case studies The initial chapters introduce the concepts and ideas behind data information literacy such as the twelve data competencies The middle chapters describe five case studies in data information literacy conducted at different institutions Cornell Purdue Minnesota Oregon each focused on a different disciplinary area in science and engineering They detail the approaches taken how the programs were implemented and the assessment metrics used to evaluate their impact The later chapters include the DIL Toolkit a distillation of the lessons learned which is presented as a handbook for librarians interested in developing their own DIL programs The book concludes with recommendations for future directions and growth of data information literacy More
