## **English Literature 2014 Predictions:**

**Prediction in Second Language Processing and Learning** Edith Kaan, Theres Grüter, 2021-09-15 There is ample evidence that language users including second language L2 users can predict upcoming information during listening and reading Yet it is still unclear when how and why language users engage in prediction and what the relation is between prediction and learning This volume presents a collection of current research insights and directions regarding the role of prediction in L2 processing and learning The contributions in this volume specifically address how different L1 based theoretical models of prediction apply to or may be expanded to account for L2 processing report new insights on factors linguistic cognitive social that modulate L2 users engagement in prediction and discuss the functions that prediction may or may not serve in L2 processing and learning Taken together this volume illustrates various fruitful approaches to investigating and accounting for differences in predictive processing within and across individuals as well as across populations

**Medical Ethics, Prediction, and Prognosis** Mariacarla Gadebusch Bondio, Francesco Sporing, John-Stewart Gordon, 2017-04-21 Recent scientific developments in particular advances in pharmacogenetics and molecular genetics have given rise to numerous predictive procedures for detecting predispositions to diseases in patients This knowledge however does not necessarily promise benign results for either patients or health care professionals The aim of this volume is to analyse issues related to prediction and prognosis as a burgeoning field of medicine which is revolutionizing the way we understand and approach diagnosis and treatment Combining epistemic and ethical reflection with medical expertise on contemporary practice and research an interdisciplinary group of international experts critically examine anticipatory medicine from various perspectives including history of medicine bioethics theories of science and health economics The highly complex issues involved in medical prediction call for a far reaching debate on the value and scope of foreknowledge For example which responsibilities and burdens arise when still healthy people learn of their predisposition to diseases How should health care insurance reflect risky life styles Is the increasing medicalization of life connected with prevention ethically sustainable and financially possible in the developing world These and other related issues are the subject of this timely and important book which not only serves as an introduction to the area but also proposes many feasible solutions to the problems outlined

**Mathematical model for the biocontrol of vector-borne viral diseases in solanaceous vegetable plants** Timothy Ado Shamaki, 2023-03-03 Doctoral Thesis Dissertation from the year 2022 in the subject Mathematics Applied Mathematics Modibbo Adama University of Technology Yola language English abstract This thesis treats the issue of Vector Borne Virus Diseases VBVDs that are transmitted in solanaceous vegetable plants by incorporating three species of vectors aphids thrips and whiteflies A mathematical model was developed that used lady beetles as biological control agents for controlling the spread of diseases in solanaceous vegetable plants through predation The research adopted the linearization method This research is restricted to a biological control of VBVDs of solanaceous vegetable plants using compartmental modeling approach The model is a system of first order nonlinear ODEs Additionally the study is limited to three solanaceous plants i.e tomato pepper and eggplant This is because solanaceous plants are among the world's most cultivated crops and given proper conditions and regular maintenance they are relatively easy to grow We focused on viral diseases that affect solanaceous vegetable plants especially Yellow Leaf Curl Virus YLCV Spotted Wilt Virus SWV and Cucumber Mosaic Virus CMV It is a common knowledge that these plant viruses also require some sort of carrier known as vectors to transmit the pathogen from plant to plant Therefore the study is demarcated to a class of aphids green peach aphids thrips *T. tabasi* and whiteflies *Bemisia tabasi* because these ones are reported as the common problem associated with solanaceous plants which can be controlled by natural predatory enemies ladybugs *hippodamia convergens*
