Doing Without Women And Work After Welfare Reform:

Doing Without Jane Henrici, 2022-10-18 The welfare reform legislation enacted in 1996 was applauded by many for the successes it had in dramatically reducing the number of people receiving public assistance most of whom were women with children Today however more than a decade later these successes seem far less spectacular Although the total number of welfare recipients has dropped by more than fifty percent nationwide evidence shows that poverty has actually deepened Many hardworking women are no better off for having returned to the workplace In Doing Without Jane Henrici brings together nine contributions to tell the story of welfare reform from inside the lives of the women who live with it Cases from Chicago and Boston are combined with a focus on San Antonio from one of the largest multi city investigations on welfare reform ever undertaken The contributors argue that the employment opportunities available to poorer women particularly single mothers and ethnic minorities are insufficient to lift their families out of poverty Typically marked by variable hours inadequate wages and short term assignments both employment and training programs fail to provide stability or the kinds of benefits such as health insurance sick days and childcare options that are necessary to sustain both work and family life The chapters also examine the challenges that the women who seek assistance and those who work in public and private agencies to provide it together must face as they navigate ever changing requirements and regulations decipher alterations in Medicaid and apply for training and education Contributors urge that the nation should repair the social safety net for women in transition and offer genuine access to jobs with wages that actually meet the cost of living

Building an Opportunity Society Lewis D. Solomon, 2017-09-08 Twenty first century US policymakers face a great challenge How can federal government help more people achieve the American dream Specifically how can we provide greater opportunities for less prosperous individuals enabling them to succeed through hard work on their merits and take increased responsibility for their lives Lewis D Solomon sees this as the challenge of our time He seeks to thread the fine public policy needle between social democratic efforts to perfect the world and those who negatively view public sector programs Based on the premise that capitalism is not inherently unjust and defective and American capitalism s structural features do not inexorability thwart opportunity Building an Opportunity Society offers the possibility of more limited carefully structured cost effective empirically verified federal policies and programs Solomon first provides the background and context of many existing domestic challenges and problems that the current and proposed federal policies and programs seek to address He then analyses the federal safety net that keeps Americans from poverty and helps reduce income inequality Finally he presents a lifecycle analysis of current federal policies and programs preventive and remedial designed as part of the Entitlement State but if restructured could facilitate the building of an Opportunity Society Solomon challenges policymakers to take a fresh look at how best to achieve society s goals for all citizens

Forced to Care Evelyn Nakano Glenn, 2012-03-05 The United States faces a growing crisis in care The number of people needing care is growing while the ranks of traditional caregivers

have shrunk The status of care workers is a critical concern Evelyn Nakano Glenn offers an innovative interpretation of care labor in the United States by tracing the roots of inequity along two interconnected strands unpaid caring within the family and slavery indenture and other forms of coerced labor By bringing both into the same analytic framework she provides a convincing explanation of the devaluation of care work and the exclusion of both unpaid and paid care workers from critical rights such as minimum wage retirement benefits and workers compensation Glenn reveals how assumptions about gender family home civilization and citizenship have shaped the development of care labor and been incorporated into law and social policies She exposes the underlying systems of control that have resulted in women especially immigrants and women of color performing a disproportionate share of caring labor Finally she examines strategies for improving the situation of unpaid family caregivers and paid home healthcare workers This important and timely book illuminates the source of contradictions between American beliefs about the value and importance of caring in a good society and the exploitation and devalued status of those who actually do the caring
