Dollars and Democracy Richard Briffault, 2022 Our federal campaign finance system is in a state of disarray The current regulatory scheme is not curbing and may be abetting the enormous increase in campaign contributions and expenditures The enormous influence of major campaign donors on the process of government is a growing cause of national concern The Special Commission of The Association of the Bar of the City of New York has spent the past two years studying the current system and developing a blueprint for reform Composed of members with diverse political views and extensive legal and government experience the Commission takes a fresh look at how to limit the undue influence of private money in federal elections The result is a highly readable report that tells how the current system established in the wake of the Watergate scandal is being manipulated by monied special interests and how the system can be reformed The report addresses how to develop a level playing field for candidates how to limit the amount of money flowing into campaigns while allowing candidates to mount effective races how to curb the use of soft money and issue advocacy while preserving the role of political parties and how to structure a system that will restore public confidence in government This account is must reading on an issue that is moving to the center of the national stage Dollars and Democracy Association of the Bar of the City of New York. Special Commission on Campaign Finance Reform, 2000 Our federal campaign finance system is in a state of disarray The current regulatory scheme is not curbing and may be abetting the enormous increase in campaign contributions and expenditures The enormous influence of major campaign donors on the process of government is a growing cause of national concern The Special Commission of The Association of the Bar of the City of New York has spent the past two years studying the current system and developing a blueprint for reform Composed of members with diverse political views and extensive legal and government experience the Commission takes a fresh look at how to limit the undue influence of private money in federal elections The result is a highly readable report that tells how the current system established in the wake of the Watergate scandal is being manipulated by monied special interests and how the system can be reformed The report addresses how to develop a level playing field for candidates how to limit the amount of money flowing into campaigns while allowing candidates to mount effective races how to curb the use of soft money and issue advocacy while preserving the role of political parties and how to structure a system that will restore public confidence in government This account is must reading on an issue that is moving to the center of the national stage **The Democratic Ethos** A. Freya Thimsen, 2022-06-08 A multidisciplinary analysis of the lasting effects of the Occupy Wall Street protest movement What did Occupy Wall Street accomplish While it began as a startling disruption in politics as usual in The Democratic Ethos Freya Thimsen argues that the movement's long term importance rests in how its commitment to radical democratic self organization has been adopted within more conventional forms of politics Occupy changed what counts as credible democratic coordination and how democracy is performed as demonstrated in opposition to corporate political influence

rural antifracking activism and political campaigns By comparing instances of progressive politics that demonstrate the democratic ethos developed and promoted by Occupy and those that do not Thimsen illustrates how radical and conventional rhetorical strategies can be brought together to seek democratic change Combining insights from rhetorical studies performance studies political theory and sociology *The Democratic Ethos* offers a set of conceptual tools for analyzing anticorporate democracy movement politics in the twenty first century

Congressional Record United States. Congress,1947 *Arms Diffusion* Thomas W. Zarzecki,2018-12-20 Weapons proliferation is one of the most pressing global concerns following the end of the Cold War Despite the absence of an overarching superpower conflict armaments and related technologies have continued to spread throughout the international system This has been particularly true in areas like East Asia and the Middle East where the traditional two party arms races are not readily apparent This text addresses these concerns and shortcomings using data on fourteen specific military technological innovations that diffused throughout the international system from 1960 to 1997

Dollars And Votes Dan Clawson,Alan Neustadt,Mark Weller,1998-05-05 Recent scandals including questionable fun raising tactics by the current administration have brought campaign finance reform into the forefront of the news and the public consciousness *Dollars and Votes* goes beyond the partial often misleading news stories and official records to explain how our campaign system operates The authors conducted thorough interviews with corporate government relations officials about what they do and why they do it The results provide some of the most damning evidence imaginable What donors especially business donors expect for their money is access and access means a lot more than a chance to meet and talk They count on secret behind the scenes deals like a tax provision that applies only to a corporation incorporated on June 13 1917 which has its principal place of business in Bartlesville Oklahoma After a deal is worked out behind closed doors one executive explains it doesn't much matter how people vote afterwards Ordinary contributions give access to Congress megabuck soft money contributions ensure access to the President and top leaders The striking truth revealed by these authors is that half the soft money comes

from fewer than five hundred big donors and that most contributions come directly or indirectly from business Reform is possible they argue by turning away from the temptation of looking at specific scandals and developing a new system that removes the influence of big money campaign contributors Democracy Vouchers and the Promise of Fairer Elections in Seattle Jennifer A. unable to recognize what we are doing to ourselves and our planet Spiritually capitalism is an avowedly amoral system but our purportedly Christian nation raises no concerted protest against its incredibly corrupting effects on ourselves and on our children Capitalism he maintains does not concern itself with morality its focus is on the bottom line The book takes a penetrating look at the economic mess we are in from a refreshingly non Marxist perspective It mercilessly attacks the current economic shibboleths that the market if given a free hand could resolve all our economic problems It blasts Milton Freedman and all the neo liberals of the Chicago School of Economics as perverting the course of economics by portraying private corporations as universally more desirable than state run utilities The author describes the workings of what he calls the credit system in detail Smart cards will end our need for cash altogether and replace it with electronic credits He argues cogently that we produce more than enough to feed and clothe everyone on this planet only capitalism s monetary strictures deny the universal distribution of this abundance His system ultimately is predicated *Report of Proceedings of the ...
