

# Components of NLP

- **Natural Language Understanding**

- Mapping the given input in the natural language into a useful representation.
- Different level of analysis required:
  - morphological analysis,*
  - syntactic analysis,*
  - semantic analysis,*
  - discourse analysis, ...*

- **Natural Language Generation**

- Producing output in the natural language from some internal representation.
- Different level of synthesis required:
  - deep planning (what to say),*
  - syntactic generation*

- NL Understanding is much harder than NL Generation.  
But, still both of them are hard.
