Derivatives 4.0 license Adolescence is a pivotal time in a girl's life The development of educational physical psychosocial familial political and economic capabilities enable girls to reach their full potential and contribute to the wellbeing of their families and society However progress is still significantly constrained by discriminatory gender norms and the related attitudes and practices which restrict girls' horizons restrain their ambition and if unfettered allow exploitation and abuse Empowering Adolescent Girls in Developing Countries explores the detrimental impact of discriminatory gender norms on adolescent girls' lives across very different contexts Grounded in four years of in-depth research in Ethiopia Nepal Uganda and Viet Nam the book adopts a holistic approach recognising the inter-related nature of capabilities and the importance of local context By exploring the theory of gendered norm change contextualising and examining socialisation processes the book identifies the patriarchal vested interests in power authority and moral privilege which combine in attempts to restrict and control girls' lives Throughout the book Empowering Adolescent Girls in Developing Countries demonstrates how efforts to develop more egalitarian gender norms can enable disadvantaged adolescent girls to change the course of their lives and contribute to societal change Accessible and informative the book is perfect for policy makers think tanks NGOs activists academics and students of gender and development studies

Motor Skills and Their Foundational Role for Perceptual, Social, and Cognitive Development Klaus Libertus, Petra Hauf, 2017-05-18 Motor skills are a vital part of healthy development and are featured prominently both in physical examinations and in parents' baby diaries It has been known for a long time that motor development is critical for children's understanding of the physical and social world Learning occurs through dynamic interactions and exchanges with the physical and the social world and consequently movements of eyes and head arms and legs and the entire body are critical during learning At birth we start with relatively poorly developed motor skills but soon gain eye and head control learn to reach grasp sit and eventually to crawl and walk on our own The opportunities arising from each of these motor milestones are profound and open new and exciting possibilities for exploration and interactions and learning Consequently several theoretical accounts of child development suggest that growth in cognitive social and perceptual domains are influenced by infants' own motor experiences Recently empirical studies have started to unravel the direct impact that motor skills may have on other domains of development This volume is part of this renewed interest and includes reviews of previous findings and recent empirical evidence for associations between the motor domain and other domains from leading researchers in the field of child development We hope that these articles will stimulate further research on this interesting question

Normal Instructor and Teachers World ,1923     **Competition Overdose** Maurice E. Stucke,Ariel Ezrachi,2020-03-17 Using dozens of vivid examples to show how society overprescribed competition as a solution and when unbridled rivalry hurts consumers kills entrepreneurship and increases economic inequality two free market thinkers diagnose the sickness caused by competition overdose and provide remedies that will promote sustainable growth and progress for everyone not just wealthy shareholders and those at the top Whatever illness our society suffers competition is the remedy Do we want better schools for our children Cheaper prices for everything More choices in the marketplace The answer is always Increase competition Yet many of us are unhappy with the results We think we re paying less but we re getting much less Our food has undeclared additives or worse our drinking water contains toxic chemicals our hotel bills reveal surprise additions our kids schools are failing our activities are tracked so that advertisers can target us with relentless promotions All will be cured we are told by increasing the competitive pressure and defanging the bloated regulatory state In a captivating expos Maurice E Stucke and Ariel Ezrachi show how we are falling prey to greed chicanery and cronyism Refuting the almost religious belief in rivalry as the vehicle for prosperity the authors identify the powerful corporations lobbyists and lawmakers responsible for pushing this toxic competition and argue instead for a healthier even nobler form of competition Competition Overdose diagnoses the disease and provides a cure for it     *Special Papers* ,1934     **New Jersey Register** ,2014-11     *College of Engineering (University of Michigan) Publications* University of Michigan.
