*Does Truth Matter?* Ronald Tinnevelt, Raf Geenens, 2008-11-30 The claim once made by philosophers of unique knowledge of the essence of humanity and society has fallen into disrepute Neither Platonic forms divine revelation nor metaphysical truth can serve as the ground for legitimating social and political norms On the political level many seem to agree that democracy doesn't need foundations Nor are its citizens expected to discuss the worth of their comprehensive conceptions of the good life According to Rawls for example we have to accept that politics in a democratic society can never be guided by what we see as the whole truth 1993 243 And yet we still call upon truth when we participate in defining the basic structure of our society and argue why our opinions beliefs and preferences need to be taken seriously We do not think that our views need to be taken into account by others because they are our views but because we think they are true If in a democratic society citizens have to deal with the challenge of affirming their claims as true we need to analyse the precise relationship between truth and democracy Does truth matter to democracy and if so what is the place of truth in democratic politics How can citizens affirm the truth of their claims and accept at the same time that their truth is just one amongst many Our book centers on the role of the public sphere in these pressing questions It tries to give a comprehensive answer to these questions from the perspective of the main approaches of contemporary democratic theory deliberative democracy political pragmatism and liberalism A confrontation of these approaches will result in a more encompassing philosophical understanding of our plural democracy which in this era of globalization is more complex than ever before Because a good understanding of the function meaning and shortcomings of the public sphere is essential to answering these questions a good deal of the book addresses these issues Historically after all the idea that citizens have to engage each other in discussion in order to determine the structure and goals of society is connected to the rational ideal of a public sphere where conflicting views can be expressed formed and transformed But hasn't the collective decision making in which everyone participates on an equal footing turned out to be a deceptive ideal or a simple illusion Not every individual in society has equal access to the podium Furthermore power being an inevitable feature of the public sphere seems to permanently endanger its democratic value Moreover the existence of this sphere depends on a specific ethos and particular public spaces where citizens are called upon to present themselves as citizens as people taking responsibility for their society It is not clear whether this ethos and these spaces exist at all and if so if they preserved their ascribed capacity for constituting democratic truth By answering these questions we expect to deepen our understanding of the relation between truth and democracy

**Journal of Education Culture and Society 2016\_2**, 2016-09-10 International scientific journal      **Conceptualizing Truth** Kevin S. Krahenbuhl, 2022-08-01 It has been widely noted that society has moved away from seeing truth as an objective and in some ways important part of what it means to be educated Varied conceptions of truth have existed and have been debated in the halls of academia for years but recently a shift has occurred in which truth has lost its status broadly as

a virtue In fact in 2016 Oxford Dictionary declared post truth as its international word of the year defined as relating to or denoting circumstances in which objective facts are less influential in shaping public opinion than appeals to emotion and personal belief Living in a world that is post truth has direct implications on the education of a society s youth This book will examine several broad conceptions of truth and present them as truth profiles considering their implications for education This survey will consider the role of truth as it relates to teaching and the act of being a teacher engage with challenging questions about what curriculum will be learned and its implications for our understanding of truth and specific consideration is attended to the impacts that one s conception of truth has for what they prioritize in the classroom their instructional practice and on learning itself This book will take a focused look at the concept of truth and how varied conceptions of truth impact teaching and learning through theoretical analytic and practical examples The Routledge Companion to the Philosophy of Architectural Reconstruction Zoltán Somhegyi, Lisa Giombini, 2024-05-30 This companion investigates the philosophical and theoretical foundations determining the conditions of possibility and the limits that make the conservation readaptation and transformation of past buildings legitimate operations As increasing ecological and economic challenges question opportunities for new construction the process of restoring transforming and readapting buildings for new or continued use is becoming an essential part of architectural practice At the same time the role of building conservation is changing from mere material preservation to being part of a broader strategy for social regeneration eco awareness and inclusive urban planning Chapters of this volume explore the complex set of considerations that inform decisions to merely preserve accurately restore or variously reuse a building They also look at the broader philosophical concerns such as ethical and aesthetic values combined with ideas of heritage history and collective identity Case studies on reconstruction after war gentrification the restoration of ancient edifices reconstruction following the effects of climate change and the use of technology solutions among many others make this a timely and urgent volume Adopting a broad transcultural perspective with contributions from five continents the volume combines theoretical approaches with more practical case study based investigations and will be of great interest to upper level students and academics working in the fields of architecture conservation urban design aesthetics and heritage management **The Routledge Handbook of Social Epistemology** Miranda Fricker, Peter J. Graham, David Henderson, Nikolaj J.L.L. Pedersen, 2019-07-19 Edited by an international team of leading scholars The Routledge Handbook of Social Epistemology is the first major reference work devoted to this growing field The Handbook s 46 chapters all appearing in print here for the first time and written by philosophers and social theorists from around the world are organized into eight main parts Historical Backgrounds The Epistemology of Testimony Disagreement Diversity and Relativism Science and Social Epistemology The Epistemology of Groups Feminist Epistemology The Epistemology of Democracy Further Horizons for Social Epistemology With lists of references after each chapter and a comprehensive index this volume will prove to be the definitive guide to the burgeoning

**Sustainable London?** Imrie, Rob, Lees, Loretta, 2014-09-24 How is London responding to social and economic crises and to the challenges of sustaining its population economy and global status Sustainable development discourse has come to permeate different policy fields including transport housing property development and education In this exciting book authors highlight the uneven impacts and effects of these policies in London including the creation of new social and economic inequalities The contributors seek to move sustainable city debates and policies in London towards a progressive socially just future that advances the public good The book is essential reading for urban practitioners and policy makers and students in social urban and environmental geography sociology and urban studies      **Misinformation in Referenda**

Sandrine Baume, Véronique Boillet, Vincent Martenet, 2020-07-07 The book identifies the impact of misinformation in the context of referenda While the notion of misinformation is at the centre of current events and is the subject of several studies it has rarely been addressed in the context of referenda or from a multidisciplinary and comparative perspective This book fills this gap Different legal orders have been chosen because of their extensive referendum practices California and Switzerland a recent legislative process on the issue of misinformation Germany France and Canada or recent experience with a vote during which it was considered that false information had been disseminated Brexit Catalan independence and Italian constitutional referendum of 2016 By bringing together authors from the political and legal sciences the book focuses on combining the expertise of researchers from different backgrounds and origins in order to propose innovative solutions In this regard the book is characterized by the fact that it does not aim to combat misinformation per se but develops suggestions meant to guarantee the conditions of formation of the political will during referenda The book will be an invaluable resource for legal scholars political scientists and specialists of political communication Outside the world of academia the book may draw the attention of policy makers practitioners and journalists confronted with the challenges of misinformation or disinformation
