newly acquired skills through detailed exercises at the end of each chapter

Book Description Data cleaning is the all important first step to successful data science data analysis and machine learning If you work with any kind of data this book is your go to resource arming you with the insights and heuristics experienced data scientists had to learn the hard way In a light hearted and engaging exploration of different tools techniques and datasets real and fictitious Python veteran David Mertz teaches you the ins and outs of data preparation and the essential questions you should be asking of every piece of data you work with Using a mixture of Python R and common command line tools *Cleaning Data for Effective Data Science* follows the data cleaning pipeline from start to end focusing on helping you understand the principles underlying each step of the process You ll look at data ingestion of a vast range of tabular hierarchical and other data formats impute missing values detect unreliable data and statistical anomalies and generate synthetic features The long form exercises at the end of each chapter let you get hands on with the skills you ve acquired along the way also providing a valuable resource for academic courses What you will learn

- Ingest and work with common data formats like JSON CSV SQL and NoSQL databases PDF and binary serialized data structures
- Understand how and why we use tools such as pandas SciPy scikit learn Tidyverse and Bash
- Apply useful rules and heuristics for assessing data quality and detecting bias like Benford s law and the 68 95 99 7 rule
- Identify and handle unreliable data and outliers examining z score and other statistical properties
- Impute sensible values into missing data and use sampling to fix imbalances
- Use dimensionality reduction quantization one hot encoding and other feature engineering techniques to draw out patterns in your data
- Work carefully with time series data performing de trending and interpolation

Who this book is for This book is designed to benefit software developers data scientists aspiring data scientists teachers and students who work with data If you want to improve your rigor in data hygiene or are looking for a refresher this book is for you Basic familiarity with statistics general concepts in machine learning knowledge of a programming language Python or R and some exposure to data science are helpful
