Epidemics Ann Herring,Alan C. Swedlund,2010-05-15 Whether in popular media or scientific literature plagues are currently a topic of tremendous interest and anxiety Through an excellent range of case studies this volume provides a broad and engaging study of the plague and its effects both historically and today *Profound Science and Elegant Literature* Stephanie P. Browner,2013-03-26 In 1847 at the first meeting of the American Medical Association the newly elected president reminded his brethren that the profession once venerated no longer earned homage spontaneously and universally The medical marketplace was crowded and competitive state laws regulating medical practice had been repealed and professional practitioners were often branded by their lay competitors as aristocrats bent on establishing a health care monopoly By 1900 the battles were over and as the president of AMA had hoped doctors were now widely venerated as men of profound science elegant literature polite accomplishments and virtue In fact by 1900 the doctor had replaced the minister as the most esteemed professional in the United States disease loomed larger than damnation and science promised to manage the discord differences and excesses that democracy seemed to license In *Profound Science and Elegant Literature* Stephanie Browner charts this trajectory and demonstrates at the same time that medicine s claims to somatic expertise and managerial talent did not go uncontested Even as elite physicians founded institutions that made professional medicine s authority visible and legitimate many others worried about the violence that might attend medicine s drive to mastery and science s equation of rational disinterest with white educated masculinity Reading fiction by a wide range of authors beside and against medical texts Browner looks to the ways in which writers such as Hawthorne Melville Holmes James Chesnutt and Jewett inventoried the collateral damage that might be done as science installed its peculiar understanding of the body A work of impressive interdisciplinary reach *Profound Science and Elegant Literature* documents both the extraordinary rise of professional medicine in the United States and the aesthetic imperative to make the body meaningful that led many American

Caring for Health Charles Webster, 2001 This book considers the historical development of health care from 1500 to the present day The authors adopt a broad interdisciplinary framework to draw on the most recent research in the fields of medical and social history While focusing primarily on the United Kingdom they also trace the impact of European systems of health care on the colonial territories in the past and its echoes in the relationship between the advanced economies and the developing world today The central premise of the book is that the strengths and limitations of health care systems around the world can only be understood in the light of past practices and structures For instance only by reference to the historical record is it possible to understand the reasons for the dominance of acute hospital specialities the Cinderella status of chronic care the prejudice against alternative medicine the difficulties experienced in regulating the medical profession or in determining the sphere of responsibility exercised by nurses Caring for Health History and Diversity explores the growth of state involvement in health care culminating with the welfare state model in the twentieth century The serious dilemmas confronting attempts to modernize health care are explored with particular reference to the UK National Health Service Other important themes include the shifting boundaries between formal and lay care with particular attention to the role of women as health care providers the emergence of specialized health care occupations and their extending aspirations to professionalization and the changing definitions of public health and community care It offers a comparative analysis of current methods of delivering and financing health care in the developed and developing world and asks whether economic

integration is leading inexorably towards a global health care system **Styles of Scientific Thinking in the European Tradition** Alistair Cameron Crombie, 1994 **A Day in the Life** Peter N. Stearns, 2006 Explores the current state of scholarship on daily life offering students and teachers an overview of the hows and whys of the little and big things people did thought and felt throughout their lives and in different historical periods **Breaking the Ice/Briser la Glace** Association of Canadian Universities for Northern Studies, Canadian Circumpolar Institute, University of Alberta. Circumpolar Students' Association, 2004 Topics range from fossil remnants on Axel Heiberg Island to collaborative tourism planning in the Yukon from the influence of sea ice and ocean circulation on arctic climate to the differences between Inuit healing and western medicine Yet there is a common thread that links all of these papers It is a place It is the North The importance of such a perspective is often lost in an academic world that rewards specialization by emphasizing expertise in a narrow field But the boundaries between disciplines are becoming more and more artificial in an increasingly complex and interconnected world An interdisciplinary approach built on place provided a platform from which researchers could transcend these boundaries The ACUNS conference and by extension these proceedings helps break the ice Includes papers by Marni Amirault Donna L Atkinson Johanna Berg Nilgun Cetin Paul G Myers Suzanne de la Barre Vasiliki Douglas Audrey R Giles Sarah Giles Brenda Guernsey Joanna Kafarowski Gita J Laidler Francis Levesque Patrick T Maher Andrew C L Postnikoff James F Basinger J M Ross Michelle Schlag Anne Pascale Targ Mariana Trindade David Greene Mike Gravel Extended abstracts by Anna Dabros Marcia J Waterway Colleen M Davison Ekaterina Evseeva Patrick Faubert Harri Vasander Line Rochefort Eeva Stiina Tuittila Jukka Laine Ulrik Pram Gad D C Hardie J A Hutchings Ioana Radu Frank J Sowa Reid A Van Brabant and Antoni G Lewkowicz
