Ellipsis Dual Vision:

Ellipses Alexandra Posen, Colin Cheney, Scott Indrisek, 2015 New York artist Stephen Posen photographs the everyday world with a painter's eye capturing compositions that often blur the lines between realism and abstraction The 174 images compiled in his first book of photographs Ellipses Dual Visions represent a broad range of locations and subjects ranging from Tonl Sap Lake in Cambodia to a flea market in rural Pennsylvania a vending machine of rubber balls to a contorted Barbie doll all culled from decades of photographs in Posen's archives The artist has arranged these images taken in very diverse places and disparate times in pairs based on form content or some obscure magnetism leaving the viewer to conjure a bridge between the two The elliptical space between the images like the series of dots that represents an omitted piece of text becomes a third entity pregnant with possibility As art editor Scott Indrisek writes in the introduction to the book 2 distinct photographs are made into strange bedfellows and that's the joy Finding connections where many see only a random chaos of image The photographs collected here are playful poetic and endlessly compelling They demonstrate the mastery and intuition of Posen's eye both as a photographer and an editor teasing elusive connections from the visual glut of the modern world Ellipse, 2002 Baroque New Worlds Lois Parkinson Zamora, Monika Kaup, 2010-07-13 Traces the changing nature of Baroque representation across European and Latin American cultures from an imperial aesthetic encoding Catholic ideologies into a means of resistance to colonialism into a mode of postcolonial self definition *Fourth Canadian Conference on Computer and Robot Vision*, 2007 **Image Analysis and Recognition** Mohamed Kamel, Aurélio Campilho, 2005-10-10 ICIAR 2005 the International Conference on Image Analysis and Recognition was the second ICIAR conference and was held in Toronto Canada ICIAR is organized annually and alternates between Europe and North America ICIAR 2004 was held in Porto Portugal The idea of offering these conferences came as a result of discussion between researchers in Portugal and Canada to encourage collaboration and exchange mainly between these two countries but also with the open participation of other countries addressing recent advances in theory methodology and applications The response to the call for papers for ICIAR 2005 was encouraging From 295 full papers submitted 153 were orally accepted 80 oral presentations and 73 posters The review process was carried out by the Program Committee members and other reviewers all are experts in various image analysis and recognition areas Each paper was reviewed by at least two reviewers and also checked by the conference co chairs The high quality of the papers in these proceedings is attributed first to the authors and second to the quality of the reviews provided by the experts We would like to thank the authors for responding to our call and we wholeheartedly thank the reviewers for their excellent work and for their timely response It is this collective effort that resulted in the strong conference program and high quality proceedings in your hands **Discrete Geometry for Computer Imagery** Michel Couprie, Jean Cousty, Yukiko Kenmochi, Nabil Mustafa, 2019-03-19 This book constitutes the thoroughly refereed proceedings of the 21st IAPR International Conference on Discrete Geometry for Computer Imagery
