Embedded Politics Gerald Andrew McDermott, 2010-11-22 Embedded Politics offers a unique framework for analyzing the impact of past industrial networks on the way postcommunist societies build new institutions to govern the restructuring of their economies Drawing on a detailed analysis of communist Czechoslovakia and contemporary Czech industries and banks Gerald A McDermott argues that restructuring is best advanced through the creation of deliberative or participatory forms of governance that encourages public and private actors to share information and take risks Further he contends that institutional and organizational changes are intertwined and that experimental processes are shaped by how governments delegate power to local public and private actors and monitor them Using comparative case analysis of several manufacturing sectors Embedded Politics accounts for change and continuity in the formation of new economic governance institutions in the Czech Republic It analytically links the macropolitics of state policy with the micropolitics of industrial restructuring Thus the book advances an alternative approach for the comparative study of institutional change and industrial adjustment As a historical and contemporary analysis of Czech firms and public institutions this book will command the attention of students of postcommunist reforms privatization and political economic transitions in general But also given its interdisciplinary approach and detailed empirical analysis of policy making and firm behavior Embedded Politics is a must read for scholars of politics economics sociology political economy business organization and public policy Gerald A McDermott is Assistant Professor of Management in The Wharton School of Management at The University of Pennsylvania His research applies recent advances in comparative political economy and industrial organization including theories of social networks historical institutionalism and incomplete markets to analyze issues of economic governance firm creation and industrial restructuring in advanced and newly industrialized countries As evidenced by Embedded Politics his current focus is on problems of institutional and organizational learning in the formation of meso level governance institutions in emerging market and postsocialist economies McDermott also works as Senior Research Fellow at the IAE Escuela de Direccion y Negocios at Universidad Austral in Buenos Aires and he has served as Project Coordinator at the Inter American Development Bank He has consulted for the Finance Private Sector and Infrastructure Division at the World Bank and advised the Deputy Foreign Minister of the Czech Republic In addition he has published many papers and book chapters on entrepreneurship privatization institutions and networks in Central Europe and Latin America

Embedded Politics, 2010 Embedded Politics offers a unique framework for analyzing the impact of past industrial networks on the way postcommunist societies build new institutions to govern the restructuring of their economies Drawing on a detailed analysis of communist Czechoslovakia and contemporary Czech industries and banks Gerald A McDermott argues that restructuring is best advanced through the creation of deliberative or participatory forms of governance that encourages public and private actors to share information and take risks Further he contends that institutional and organizational changes are intertwined and

that experimental processes are shaped by how governments delegate power to local public and private actors and monitor them Using comparative case analysis of several manufacturing sectors Embedded Politics accounts for change and continuity in the formation of new economic governance institutions in the Czech Republic It analytically links the macropolitics of state policy with the micropolitics of industrial restructuring Thus the book advances an alternative approach for the comparative study of institutional change and industrial adjustment As a historical and contemporary analysis of Czech firms and public institutions this book will command the attention of students of postcommunist reforms privatization and political economic transitions in general But also given its interdisciplinary approach and detailed empirical analysis of policy making and firm behavior Embedded Politics is a must read for scholars of politics economics sociology political economy business organization and public policy Gerald A McDermott is Assistant Professor of Management in The Wharton School of Management at The University of Pennsylvania His research applies recent advances in comparative political economy and industrial organization including theories of social networks historical institutionalism and incomplete markets to analyze issues of economic governance firm creation and industrial restructuring in advanced and newly industrialized countries As evidenced by Embedded Politics his current focus is on problems of institutional and organizational learning in the formation of meso level governance institutions in emerging market and postsocialist economies McDermott also works as Senior Research Fellow at the IAE Escuela de Direccion y Negocios at Universidad Austral in Buenos Aires and he has served as Project Coordinator at the Inter American Development Bank He has consulted for the Finance Private Sector and Infrastructure Division at the World Bank and advised the Deputy Foreign Minister of the Czech Republic In addition he has published many papers and book chapters on entrepreneurship privatization institutions and networks in Central Europe and Latin America

The Rise and Fall of Czech Capitalism Martin R. Myant, 2003 The aim of the government in the mid 1990s was the creation of a Czech capitalism with Czech owned business empires and banks A detailed analysis of developments in banking and industrial enterprises shows

how the chosen strategy led instead to continuing inefficiency flawed management decisions and uncontrolled profiteering. These combined factors contributed to serious economic difficulties in the latter part of the decade with success stories largely confined to foreign owned firms. After 1998 a new government attempted to encourage economic revival based upon a fresh strategy which emphasised the sale of banks and industrial enterprises to foreign owners. Even with this new reform strategy the author concludes that the results were at best mixed. Throughout the analysis the author provides in depth commentary on a variety of topics including the sources of economic growth the role of the central bank developments in banking and industrial enterprises and the impact of inward direct investment. **American Sociological Review** Frank Hamilton Hankins, 1936.
