Embryo Implantation Daniel D. Carson, 1999-09-24 This volume contains the proceedings of the International Symposium on Embryo Implantation Molecular Cellular and Clinical Aspects held from October 3-6 1997 in Newport Beach California Internationally recognized experts discuss the development and future of human in vitro fertilization and embryo implantation the cellular aspects of implantation hormonal regulation molecular markers of receptivity trophoblast factors primate models and animal studies and transcriptional regulation of maternal fetal recognition [Immunology of Gametes and Embryo Implantation](#) Udo R. Markert, 2005-01-01 This book provides an overview of the current knowledge of physiological and pathological immune reactions which favor or disturb fertility The regulation of embryo implantation and trophoblast invasion through cytokines growth factors and other pregnancy related immunoregulatory molecules is described in detail Autoimmunity and allergy are presented as possible causes of reproductive failure [Implantation](#) Michael G. Chapman, J. Geddis Grudzinskas, Tim Chard, 2013-03-14 The advent of assisted conception procedures such as in vitro fertilisation IVF has provided the impetus for exploration of the factors that lead to the establishment of pregnancy This collection of papers from leading research workers brings together current concepts of the processes which may be of importance in implantation The complex signals from the embryo to the ovary endometrium and myometrium are now being revealed through studies in both primates and other mammalian species This book addresses the interrelationship of pituitary and ovarian hormones in controlling ovulation and the preparation of the intrauterine environment for implantation Once fertilisation has occurred and trophoblast has formed the next vital step is the production of materials which signal the presence of the pregnancy to the rest of the body Trophoblastic proteins and other early pregnancy factors are prime candidates for this role Recent studies have emphasised the importance of the intrauterine environment in implantation Specific secretory products of the endometrium have great potential in this process The prostaglandins also play an essential part Immunological adjustments are now considered a condition for the successful establishment of pregnancy The possible use of immuno therapy in the treatment of recurrent abortion has highlighted interest in this area The use of immunological techniques for contraception are in their infancy but offer much hope for the future **Trophoblast Invasion and Endometrial Receptivity** J D Aplin, H W Denker, 1990-06-30 **A Three-dimensional in Vitro Model for Studying Primate Embryo Implantation** Diancheng Zhang, 2007 *Effect of Estrogen and Progesterone on Decidua Formation and Embryo Implantation in the Rat* Chi-chuan Chang, 1968 [MEDICAL EMBRYOLOGY MADE VISUAL An Interactive eBook for Self-Paced Learning](#) Eugene Daniels, 2025-05-14 Medical Embryology is designed for self paced learning within contemporary medical curricula It engages medical students from their first year onward emphasizing the correlations between embryology and anatomy as well as stem cell lineage relationships It empowers learners to adopt a developmental holistic perspective and take control of their education at their own pace navigate the clinical complexities of human embryology and address

In Vitro Fertilization and Embryo Transfer Alan Trounson, Carl Wood, 1984

Endometrium and Embryo Implantation G. Chaouat, 2007 Implantation of the embryo into the maternal endometrium represents a crucial step in the reproductive process It results from a cascade of finely tuned events Despite recent progress in the field many points still require clarification This special issue offers a broad coverage of the latest findings New concepts and applications are presented which are based on data strongly suggesting that both embryo implantation and uterine receptivity are controlled primarily though not exclusively by locally acting growth factors and cytokines Different processes are also studied such as the MMPs expression regulating the trophoblast invasion or the possible secretion of sHLA G molecules by human embryos and its correlation to a successful pregnancy Further points under discussion are the chromosomal imbalance leading to embryonic mortality and the potential of the baboon model to study embryo implantation Finally a comparative survey is given of the general mechanical endocrinological and cellular aspects involved in implantation in mammals Clinicians as well as basic researchers will find this special issue to be a valuable source of new insights

Model Organisms in Embryonic Development Michael Schubert, Gabriella Lania, Alice Jouneau , Denhi Schnabel, 2025-08-25 The field of developmental biology and the study of embryonic development relies on a diverse range of model systems that offer unique advantages and perspectives allowing researchers to uncover fundamental principles and mechanisms underlying this intricate process This Research Topic aims to explore the diverse array of model organisms used in the study of embryonic development and highlight their valuable insights Contributions to this collection may encompass various experimental approaches comparative analysis revealing different models specific strengths and contributions and covering all aspects of research investigating embryonic development From the more well established models such as fruit flies zebrafish and *Caenorhabditis elegans* which have elucidated the mechanisms of embryogenesis pattern formation and tissue morphogenesis to mice frogs and more which have allowed us to in depth genetic manipulation and greater experimental accessibility We welcome many article types including Original Research articles mini Reviews Methods Perspectives and Opinion pieces to provide a comprehensive and multidimensional view of the field Topics of interest include but are not limited to Comparative studies examining similarities and differences in embryonic development across different model organisms shedding light on evolutionary conserved mechanisms Studies investigating the genetic and molecular factors regulating key developmental processes such as gastrulation organogenesis tissue patterning and cell fate determination Research exploring the roles of various signaling pathways such as Wnt Notch TGF beta and Hedgehog in orchestrating embryonic development in different organisms A full list of accepted article types including descriptions can be found at this link

Knobil and Neill's Physiology of Reproduction Tony M. Plant, Anthony J. Zeleznik, 2014-11-15 The Fourth Edition of Knobil Neill continues to serve as a reference aid for research to provide the historical context to current research and most importantly as an aid for

graduate teaching on a broad range of topics in human and comparative reproduction In the decade since the publication of the last edition the study of reproductive physiology has undergone monumental changes Chief among these advances are in the areas of stem cell development signaling pathways the role of inflammation in the regulatory processes in the various tissues and the integration of new animal models which have led to a greater understanding of human disease The new edition synthesizes all of this new information at the molecular cellular and organismal levels of organization and present modern physiology a more understandable and comparative context The Fourth Edition has been extensively revised reflecting new fundamental advancements in this rapidly advancing field Provides a common language for researchers across the fields of physiology endocrinology and biology to discuss their understanding of reproduction Saves academic researchers time in quickly accessing the very latest details on reproductive physiology as opposed to searching through thousands of journal articles
