Faculty in the science technology engineering and mathematics STEM disciplines face intensifying pressures in the 21st century including multiple roles as educator researcher and entrepreneur In addition to continuously increasing teaching and service expectations faculty are engaged in substantive research that requires securing external funding mentoring other faculty and graduate students and disseminating this work in a broad range of scholarly outlets Societal needs of their expertise include discovery innovation and workforce development It is critical to provide STEM faculty with the professional development to support their complex roles and to base this development on evidence derived from research This edited handbook provides STEM stakeholders with an opportunity to share studies and or experiences that explore STEM faculty development FD in higher education settings More specifically we include work that examines faculty development planning techniques models experiences and outcomes focused on supporting the teaching research service and leadership responsibilities of STEM faculty The Handbook is suited for researchers and practitioners in STEM STEM Education Mathematics Science Technology and Engineering disciplines It is also suited towards faculty developers higher education administrators funding agencies industry leaders and the STEM community at large This handbook is organized around three constructs INPUTS MECHANISMS and OUTPUTS The STEM faculty development inputs construct focuses on topics related to the characteristics of faculty members and institutions that serve as barriers or supports to the adoption and implementation of holistic STEM faculty development programs Questions addressed in the handbook around this topic include What barriers supports exist for STEM faculty How are these barriers supports being addressed through STEM FD How do contexts e g economic political historical influence faculty administrative needs related to STEM FD How do demographics e g gender ethnicity age family background influence faculty administrative needs related to STEM FD The STEM faculty development mechanisms construct focuses on topics related to the actual implementation of STEM faculty development and we consider the potential models or structures of STEM faculty development that are currently in place or conceptualized in theory Questions addressed in the handbook around this topic include What are the processes for developing models of STEM FD What are effective models of STEM FD How is effectiveness determined What roles do stakeholders e g faculty administration consultants play within STEM FD mechanisms The STEM faculty development outputs construct focuses on how to best understand the influence of STEM faculty development on outcomes such as productivity teacher quality and identity in relation to faculty development Questions addressed in the handbook around this topic include How has STEM FD influenced higher education practices and settings What are appropriate output measures and how are they used in practice What collaborations emerge from STEM FD How does STEM FD affect other STEM

stakeholders e.g. students, administration, business community. The aim for this handbook was to examine the multifaceted demands of faculty roles and together with members of the STEM education community envision pathways through which universities and individuals may support STEM colleagues regardless of their experience or rank to enjoy long and satisfying careers. Our hope is for these chapters to aid readers in deep reflection on challenges faculty face to contemplate adaptations of models presented and to draw inspiration for creating or engaging in new professional development programs. Chapters across this handbook highlight a variety of institutional contexts from 2-year technical colleges to teaching-focused institutions in addition to research-centric settings. Some chapters focus primarily on teaching and learning practices and offer models for improving STEM instruction. Others focus on barriers that emerge for STEM faculty when trying to engage in development experiences. There are chapters that examine tenure structures in relation to faculty development and how STEM FD efforts could support research endeavors. Mentorship and leadership models are also addressed along with a focus on equity issues that permeate higher education and impact STEM FD. It is our sincere hope that this Handbook sparks increased discourse and continued explorations related to STEM FD and in particular the intentional focus of faculty development initiatives to extend to the many facets of academic life.

STEM Learning Mesut Duran, Margret Höft, Brahim Medjahed, Daniel B. Lawson, Elsayed A. Orady, 2016-08-23. This book reports the results of a three-year research program funded by the National Science Foundation which targeted students and teachers from four Detroit high schools in order for them to learn experience and use IT within the context of STEM. IT STEM and explore 21st-century career and educational pathways. The book discusses the accomplishment of these goals through the creation of a Community of Designers, an environment in which high school students and teachers, undergraduate graduate student assistants and STEM area faculty and industry experts worked together as a cohesive team. The program created four project-based design teams, one for each STEM area. Each team had access to two-year round IT STEM enrichment experiences to create high-quality learning projects, strategies and curriculum models. These strategies were applied in after-school, weekend and summer settings through hands-on inquiry-based activities with a strong emphasis on non-traditional approaches to learning and understanding. The book represents the first comprehensive description and analysis of the research program and suggests a plan for future development and refinement.

Navigating Academia: A Guide for Women and Minority STEM Faculty Pauline Mosley, S. Keith Hargrove, 2014-12-08. Navigating Academia: A Guide for Women and Minority STEM Faculty explores the infrastructure of the academy and provides a systematic account of where and why women and minorities fall behind men in the preparation for and development of their academic careers. This book offers useful strategies for recruiting, retaining and advancing women and minorities. Chapters include testimonials from faculty and administrators about how they made their ascent within the academy. Navigating Academia: A Guide for Women and Minority STEM Faculty also discusses how to modify and expand faculty recruiting programs, how to diversify search committees, how to encourage intervention by deans.

and how to assess past hiring efforts This guide is an important resource for women and minorities seeking success in the academy as well as for administrators focused on faculty and professional development 20 Strategies for STEM Instruction William N. Bender, 2016 Exploring the latest trends and teaching techniques this book highlights research evidence and offers customizable step by step guidelines to help teachers integrate project based learning with STEM instruction modify strategies use engineering design principals to focus on real world problems and emphasize teamwork and collaboration around rigorous math and science content *STEM, Standards, and Strategies for High-quality Units* Rodger W. Bybee, 2020 Science education s two fold challenge is clear Schools need to 1 align their curricula with contemporary state standards and 2 meet the growing demand for STEM education What s not as clear how to meet the challenge if your school doesn t have the right instructional materials STEM Standards and Strategies for High Quality Units is designed to address both these needs Thought leader and curriculum expert Rodger W Bybee has assembled a guide to creating coherent high quality classroom materials that support the standards and STEM The book provides practical background information and activities that can be adapted by individual teachers professional learning communities and professional developers It starts with a section on making foundational decisions about your STEM unit s development Later sections discuss getting started with preliminary designs improving the designs with new knowledge and skills developing the unit and then teaching and further improving the unit as needed Throughout Bybee integrates contemporary educational strategies such as the 5E Instructional Model backward design and lesson study Because most states have new science standards it only makes sense to incorporate various aspects of those standards in STEM activities he writes STEM Standards and Strategies for High Quality Units is the book to help you do this It s useful whether your school is developing a new STEM program adapting current instructional materials or creating new materials of its own **Standing Our Ground** Shirley M. Converting STEM into STEAM Programs Arthur J. Stewart, Michael P. Mueller, Deborah J. Tippins, 2020-02-28 This book examines the push and pull of factors contributing to and constraining conversion of STEM science technology engineering and math education programs into STEAM science technology engineering math and arts education programs The chapters in this book offer thought provoking examples theory and suggestions about the advantages methods and challenges involved in making STEM to STEAM conversions at levels ranging from K12 through graduate university programs A large driving force for STEM to STEAM conversions is the emerging awareness that the scientific workforce finds itself less than ideally prepared when engaging with so called wicked problems the complex suite of emerging multifaceted issues such as global climate change social injustice and pandemic diseases Dealing with these issues requires cross disciplinary expertise and the ability to insert technical and scientific understanding effectively into areas of public planning and policy The different models and possibilities for STEAM as the next phase of the STEM revolution laid out in this book will promote research and further our understanding of STEAM as a forward thinking approach to education Gillian Roehrig STEM Education University

of Minnesota USA The ideal teacher sees opportunities for integrating ideas from multiple disciplines into every lesson This book offers many worthwhile suggestions on how to do that deliberately and systematically George DeBoer Project 2061 of the American Association for the Advancement of Science USA For the last several years calls for expanding STEM education have grown but so too have concerns about technocratic approaches to STEM This volume challenges the community to consider broader views on STEM by focusing on the place of arts education within this movement The chapters offer much needed new perspectives on the re integration of the arts and sciences Troy Sadler School of Education University of North Carolina USA
