Autism and Therapy Horses

Autism is a disability that affects the way the brain works. People with autism may have **outlet** time, communication and interacting with others. Signs of autism usually appear by the age of three. Doctors and scientists are not sure what causes autism, but they do know it is **not contagious**. An autistic child can't give autism to a friend or classmate. An estimated 1,500,000 people in the United States have autism.

Autism is a **neurological** disorder, which means it affects the brain. Their brain just works differently. Children with autism may have difficulties with certain activities, but they may have strengths in other areas. For instance, a child with autism may be a math whiz, a great artist or unbeatable at computer games. Yet, they may have trouble putting their thoughts into words and communicating with others.

Autism is not something children outgrow. While there is no cure for autism, there are therapies and treatments that can make living and learning with autism easier. One of the therapies is **equine therapy**, which is therapy involving a horse.

Equine therapy is a safe and effective way for children to interact and emotionally with others. They may avoid making eye contact. In equine therapy, children not only ride horses, they communicate with and care for their horses, too. They may brush them, pat them and even hug them. For many children, riding and caring for their horse helps them form
