Chain Store Age ,2001 *Amazon Marketing Strategy* Manfred Damsch,2010-12 Research Paper undergraduate from the year 2008 in the subject Business economics Marketing Corporate Communication CRM Market Research Social Media University of applied sciences Munich language English abstract Founded in Seattle Washington USA by Jeffrey Bezos in 1995 Amazon is now the world leading internet sales platform for consumer goods Offering books in the first place Amazon now offers products in more than 40 different product categories Omnipresent everywhere in the internet Amazon claims to be the world s most customer centric company Indeed Amazon is doing everything to achieve this goal through continuous service improvement Whenever a new service will be launched customers expectations always define the key features But what an internet company would Amazon

be if this customer centric mission wouldn't be promoted and capitalised. Grown up with the internet and familiar with all its marketing instruments, Amazon uses every opportunity to promote its brand and the offered services. Beside the user experience, Amazon's success depends on its propagation and accessibility. Amazon manages this by sophisticated partner programs to grow fast and continuously. In consequence of the market power, Amazon's prices for goods are more than competitive in the internet. Since the internet still hasn't reached its maximum capacity and far not everybody, especially elder generations, uses the internet for daily shopping, Amazon's growth will continue and further customer centric services will follow as long as the vision keeps alive.

E-Commerce with Amazon. Helpful Measures for Achieving Successful Commerce and Increasing Reach Anastazia Spajic, 2022-01-20. Seminar paper from the year 2021 in the subject Business economics. E-Commerce language: English. abstract: In 2020, e-commerce sales in Germany reached a volume of over 60 billion euros in business-to-consumer (B2C) business. Amazon, the US company, accounted for a significant share of this market. In fact, Amazon generated US 29.57 billion in sales in Germany and as much as US 386.06 billion globally. In Germany, 90 % of online customers are actually Amazon customers. Moreover, 50 % of them conduct product searches via Amazon. The revenue figures confirm that Amazon has a leading position in online retail for a reason: Consumers' online understanding is influenced by the standards set by Amazon. This is because Amazon has clearly shown what is possible online and therefore there will continue to be hardly any way around Amazon in online business. At the beginning of the paper, the most important terms are defined and explained, which should contribute to a better understanding of the topic. Thereupon, the origin, the development as well as the applicable conditions of Amazon are explained. This is followed by defining and explaining the measures that can be applied for successful trading on Amazon. Finally, the topic is rounded off with a conclusion and the research question is answered based on the knowledge gained in the term paper.
