The Autobiography of Charles Darwin Charles Darwin, 2010-09-08 My father's autobiographical recollections were written for his children and written without any thought that they would ever be published To many this may seem an impossibility but those who knew my father will understand how it was not only possible but natural The autobiography bears the heading Recollections of the Development of my Mind and Character and end with the following note Aug 3 1876 This sketch of my life was begun about May 28th at Hopedene Mr Hensleigh Wedgwood's house in Surrey and since then I have written for nearly an hour on most afternoons It will easily be understood that in a narrative of a personal and intimate kind written for his wife and children passages should occur which must here be omitted and I have not thought it necessary to indicate where such omissions are made Francis Darwin *First People* David King, 2008-11-03 First People tells the story of American Indians from their arrival on the continent 10 000 years ago to their search for identity in the modern world Avoiding standard clichés and easy generalizations the book presents each tribe as an individual evolving culture with its own history artwork and traditions With a wealth of modern and historic images innovative page layouts and compelling first person accounts this is an eye opening look at the richness and variety of North American tribes and a moving account of the European conquest *Charles Darwin* E. Janet Browne, 1996 Traces the life of the great British scientist describes his travels as a naturalist and traces the development of his theories The Autobiography of Charles Darwin Charles Darwin, Sir Francis Darwin, 2023-08-31 Reproduction of the original The publishing house Megali specialises in reproducing historical works in large print to make reading easier for people with impaired vision **International Catalogue of Scientific Literature [1901-14]**, 1903 **Charles Darwin** Peter J. Bowler, 1996-04-11 Upon publication Charles Darwin's *The Origin of Species* excited much debate and controversy challenging the foundations of Christianity nonetheless underpinning the Victorian concept of progress It still evokes powerful and contradictory responses today Peter Bowler's

study of Darwin's life first published in 1990 combines biography and cultural history. Emphasizing in particular the impact of Darwin's work, he shows how Darwin's contemporaries were unable to appreciate precisely those aspects of his thinking that are considered scientifically important today. He also demonstrates that Darwin was a product of his time but he also transcended it by creating an idea capable of being exploited by twentieth-century scientists and intellectuals who had very different values from his own.
