Federal Plan for Cyber Security and Information Assurance Research and Development National Science and Technology Council (U.S.) Interagency Working Group on Cyber Security and Information Assurance, 2006 *Proceedings of a Workshop on Deterring Cyberattacks* National Research Council, Policy and Global Affairs, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee on Deterring Cyberattacks: Informing Strategies and Developing Options for U.S. Policy, 2010-10-30 In a world of increasing dependence on information technology the prevention of cyberattacks on a nation's important computer and communications systems and networks is a problem that looms large Given the demonstrated limitations of passive cybersecurity defense measures it is natural to consider the possibility that deterrence might play a useful role in preventing cyberattacks against the United States and its vital interests At the request of the Office of the Director of National Intelligence the National Research Council undertook a two phase project aimed to foster a broad multidisciplinary examination of strategies for deterring cyberattacks on the United States and of the possible utility of these strategies for the U S government The first phase produced a letter report providing basic information needed to understand the nature of the problem and to articulate important questions that can drive research regarding ways of more effectively preventing discouraging and inhibiting hostile activity against important U S information systems and networks The second phase of the project entailed selecting appropriate experts to write papers on questions raised in the letter report A number of experts identified by the committee were commissioned to write these papers under contract with the National Academy of Sciences Commissioned papers were discussed at a public workshop held June 10-11 2010 in Washington D C and authors revised their papers after the workshop Although the authors were selected and the papers reviewed and discussed by the committee the individually authored papers do not reflect consensus views of the committee and the reader should view these papers as offering points of departure that can stimulate further work on the topics discussed The papers presented in this volume are published essentially as received from the authors with some proofreading corrections made as limited time allowed
