Contagion in Prussia, 1831 Richard S. Ross III, 2015-09-18 In 1831 Prussia was consumed by two fears the possibility of revolution resulting from the 1830 November Uprising of Poland against Russia and a looming cholera epidemic As the contagion made its way across Russia Prussian

medical officials took note and prepared to respond to what they thought was a highly contagious disease When it spread to Poland Prussia instituted a strict quarantine policy on its border inhibiting Prussian support of the Russian war effort in Poland From the Polish perspective the quarantine was seen as a deliberate act of sabotage against the revolution an attempt to cut off trade with the West This book examines the Prussian government s strict health policy and its consequences including social unrest and resulting public health reforms Polish public health policy is investigated in light of the revolutionary government s needs Information is provided on the cholera camps established by Prussia to quarantine Polish soldiers who crossed the border as refugees in July 1831 the height of the cholera fear in Prussia **Murray and Nadel's**

Performing Neurology Jonathan W. Marshall, 2016-07-13 This text provides a study of Jean Martin Charcot a founding figure in the history of neurology as a discipline and a colleague of Sigmund Freud It argues that Charcot's diagnostic and pedagogic models explaining both how disease is recognized and described and how to teach the act of neurological diagnosis should be considered through a theatrical lens Considering the constitution of the living moving body in terms of performance Charcot created a situation whereby the line between deceptive acting and real pathology scientific accuracy and creative falsehood and indeed between health and unhealth becomes blurred The physician becomes a medical subject in his or her own display transforming medicine into a potentially destabilizing even grand guignol-esque discourse Offering a unique insight into Charcot's work his concepts and his methods this text represents a unique and interdisciplinary analysis cutting across the fields of art and neurology
