From an Association to a Royal College Alan Craft, Keith Dodd, 2017-03-21 This book describes the history of the Royal College of Paediatrics and Child Health RCPCH covering the period from 1988 to 2014 which includes the transition from the British Paediatric Association BPA to the formation of the now established RCPCH The book contains a collection of viewpoints from paediatricians who held officer posts with the association and College through this time The authors offer insights and reflections to help the reader understand where the College is at the moment on a variety of core paediatric issues and significantly where it has come from The formation of the RCPCH from the BPA was very controversial with some members resigning from the RCP Since then the College has come a long way and is now recognised as the definitive body to speak for children's health in the UK and has forged relationships with many overseas countries It has produced influential documents and lobbied for advances in the practice of paediatrics It has reported on standards for how children should be

cared for in emergency and urgent care settings launched policy to improve how children are looked after in the secure estate and produced teaching and training materials for child protection among many other contributions to child health Finally it will be of interest to other Colleges and professional bodies as well as to Members and Fellows of the College

Why Hospitals Fail Prasad Godbole,Derek Burke,Jill Aylott,2017-06-28 This book explores the current wider political social and economic context of hospitals in the public and private sector globally and identifies the push and pull tension between the demands of the quality regulator and the requirements of health care commissioning processes This book draws on the evidence of what works to improve the quality of hospital services in the development of medical and clinical leadership models The book seeks to develop a specific paradigm shift in understanding the development of medical leaders by promoting a culture of engagement through participation and one that is defined by the experiences of medical leaders The editors examine new and emergent models of leadership and their contribution to explain effective and sustainable change and suggest that theoretical models of leadership are often unable to explain many of the practice led challenges presented in hospitals It will be useful reading for specialists seeking to develop their own learning as a leader and who identify their learning needs Practice Gaps in Dermatology, An Issue of Dermatologic Clinics Murad Alam,2016-07-15

Engineers,1962 Tintinalli's Emergency Medicine: A Comprehensive Study Guide, 8th edition Judith E. Tintinalli,J.

Stephan Stapczynski,O. John Ma,David M. Cline,Garth D. Meckler,2016-03-22 The most widely used and highly regarded textbook and reference of emergency medicine Endorsed by the American College of Emergency Physicians The 8th edition

of Tintinalli's Emergency Medicine provides the depth and breadth of coverage that reflects the complexity and expertise needed to practice emergency medicine successfully in today's fast-paced environments. It is an important contemporary clinical emergency care resource for physicians, NPs, and PAs who practice emergency medicine and for emergency medicine and pediatric emergency medicine fellows. It remains the preferred study guide for in-training and board examinations and recertification. NEW to this edition: Full color design with more tables than ever to succinctly present key information; Extensive updates to all sections incorporating the latest guidelines, evidence-based protocols, and relevant research; Expanded pediatric section with complete clinical information for general and pediatric emergency physicians; Expanded coverage of common emergency department procedures with improved illustrations; Online access to more than 30 videos covering a wide range of procedural and diagnostic topics and focusing on the latest ultrasound-guided techniques. From the reviews of the seventh edition: Collectively they have once again produced an excellent text that manages to cover the broad scope of emergency medicine while remaining an easily readable and practical resource. Last, for the inevitable comparison of this current edition of Tintinalli's Emergency Medicine with other available emergency medicine textbooks available in my opinion, Tintinalli's still comes out on top. It is more concise and easier to read than some, yet it covers the breadth of emergency medicine practice more comprehensively than others. Just as previous editions did, the seventh presents all of the most pertinent and up-to-date information in a well-organized format that is comprehensive yet easy to read. That and many of the attractive new features in this current edition will ensure its place on my bookshelf for years to come. JAMA

Intercultural Crisis Communication Christophe Declercq, Federico M. Federici, 2019-11-14 Intercultural Crisis Communication poses pertinent questions and provides powerful responses to crises that have characterised the modern world since 2010. Language mediation in situations of disaster, emergency and conflict is an underdeveloped area of scholarship in Translation Studies. This book responds to a clear need for research drawn from practical experiences in the field and explores the crucial role of translation, interpretation and mediation in contexts of crises. Particular consideration is given to situations where rare or minority languages represent a substantial obstacle to humanitarian operations. Contemporary case studies from the USA, Africa, Europe and Armenia provide major examples of crisis communication that call for more efficient language mediation. Such examples include Syrian displacement, the refugee crisis in Croatia and Italy, international terrorism and national public administration interpreting in conflict and for *M decins sans Frontières* as well as the integration of refugee doctors for employment in the UK. With contributions from experts in the field, this volume is of international relevance and provides a multifaceted overview of intercultural communication issues and remedies during crises. *Doctors in Training: 2011 Step 1 Study Guide* Brian Jenkins, 2011 **Computational Radiomics for Cancer Characterization** Omar Sultan Al-Kadi, Xujiang Ye, Giorgio Russo, Joseph Ross Mitchell, 2022-10-21 [The Institute of Radio Engineers Fiftieth Anniversary, 1912-1962](#) Institute of Radio Engineers, 1962 *Proceedings of the IRE.*, 1962
