Morgan,2017 Sustainable and inclusive growth in emerging Asian economies requires high levels of public investment in areas such as infrastructure education health and social services The increasing complexity and regional diversity of these investment needs together with the trend of democratization has led to fiscal decentralization being implemented in many Asian economies This book takes stock of some major issues regarding fiscal decentralization including expenditure and revenue assignments transfer programs and sustainability of local government finances and develops important findings and policy recommendations *Spain* International Monetary Fund. European Dept.,2015-08-14 This Selected Issues paper presents a preliminary assessment of recent labor market reforms in Spain where the 2012 labor market reforms are making a difference Wage moderation is contributing to a visible recovery in headline employment growth and the reforms have made the labor market more resilient to shocks Some evidence exists that the contribution of temporary contracts to employment growth has started to decrease However the reliance on temporary workers remains strong overall and further structural reforms will be required to reduce the still very high level of long term

structural unemployment **Advances in Local Public Economics** Minoru Kunizaki, Kazuyuki Nakamura, Kota Sugahara, Mitsuyoshi Yanagihara, 2019-02-23 This book introduces recent developments in both theoretical and empirical analyses of local public economics Theories of those economics as well as empirical analyses have been developed dramatically in various directions in recent years One direction has been to reflect real economic circumstances especially in Japan In the early 2000s Japan experienced the so called great merger or consolidation of municipalities in the Heisei era 1999 through the present with the number of municipalities shrinking from 3 232 to 1 821 for increasing administrative and financial efficiency This phenomenon is mainly due to a drastic change in demography in Japan the diminishing birthrate and aging population Following the consolidation regional coordination has been undertaken to raise overall administrative and financial efficiency In sum various types of public policies for tackling the decreasing birthrate and aging population have been carried out Urban sprawl and the timing of municipal mergers are dealt with from a broad point of view and public child care services and tax competition are investigated from a policy standpoint Another direction has been to incorporate new ideas for forming theoretical frameworks for local public finance most of which have been based on static situations In the recent trend toward globalization local governments have attended not only to the welfare of residents but also to the interests of regional economic development In addition decision making by local governments has tended to be affected by political activities Thus the endogenous growth setting and lobbying activities for the activities of local governments are discussed in the book With these new directions for analyses the author tackles the topics of tax competition cross border shopping local provision of public goods and soft budgets thus covering a broad range of aspects of local public finance

Handbook on Subnational Governments and Governance Claudia N. Avellaneda, Ricardo A. Bello-Gómez, 2024-03-14 This comprehensive Handbook analyses the political financial administrative and managerial dimensions of subnational governments It examines the profound differences between forms of subnational governance across the world as well as the common challenges faced by governments below the national level **Steering the Metropolis** Inter American Development Bank, United Nations Human Settlements Programme, Development Bank of Latin America, 2017-10-24 A distinctive feature of urbanization in the last 50 years is the expansion of urban populations and built development well beyond what was earlier conceived as the city limit resulting in metropolitan areas This is challenging the relevance of traditional municipal boundaries and by extension traditional governing structures and institutions Steering the Metropolis Metropolitan Governance for Sustainable Urban Development encompasses the reflections of thought and practice leaders on the underlying premises for governing metropolitan space sectoral adaptations of those premises and dynamic applications in a wide variety of contexts Those reflections are structured into three sections Section 1 discusses the conceptual underpinnings of metropolitan governance analyzing why political technical and administrative arrangements at this level of government are needed Section 2 deepens the discussion by addressing specific sectoral themes of mobility land use

planning environmental management and economic production as well as crosscutting topics of metropolitan governance finance and monitoring and evaluation Section 3 tests the concepts and their sectoral adaptations against the practice with cases from Africa America Asia and Europe **Fiscal Federalism 2016** OECD,2016 Foreword Executive summary A bird s eye view of fiscal decentralisation Fiscal constitutions Reforming the tax on immovable property Taxes or grants What revenue source for sub central governments Monitoring sub central government debt Trends challenges and practices Spending power of sub central governments *Fiscal Federalism-Decentralisation and the size of government* Ina Walcherberger,2016-02-23 Master s Thesis from the year 2015 in the subject Business economics Economic Policy grade language English abstract A large number of countries are trying to improve their ability to serve their inhabitants more efficiently and more effectively To accomplish this ambition a reawakening of interest in the practices and in the principles and of fiscal federalism is mandatory Questions arise such as How many taxes are necessary to provide an efficient amount of local public goods How should the taxes be allocated most reasonable between the different levels of governments Which level of government should have how much freedom of choice concerning tax revenues and tax expenditures or differently which degree of decentralisation is most constructive Generally two conflicting possibilities to provide an efficient level of local public goods are existing The first one proposes a high degree of centralisation of the tax system which would lead if the government is totally benevolent to an efficient output of local public goods An argument against centralisation is that a centralised system cannot serve the different needs and preferences of the inhabitants of unequal regions The second perception states that an efficient level of local public can be provided if the system is decentralised A possible disadvantage of decentralisation is the appearance of tax competition which may lead to an inefficient low level of local public goods The discrepancy between these two conflictive systems is going to be discussed in this thesis Furthermore politico economic mechanisms which are supposed to explain the correlation between degree of centralisation and size of government are introduced which leads to the research question of this thesis Does a decentralised tax system lead to a smaller size of government compared to a centralised tax system Which politico economic mechanisms are responsible for this correlation In relation to these questions different approaches are discussed underlined by theoretical and empirical models The first one a public choice approach states that central governments operate like monopolists or leviathans extracting as much tax revenues from the citizens as possible The aim is not to maximise social welfare but to increase their control over the resources of the economy This approach was formulated by Brennan s and Buchanan s Leviathan hypothesis 1980 stating subject to the above mentioned conditions that a higher degree of decentralisation leads to a smaller size of government

The Theories of Decentralization and Local Government Kwame Badu Antwi-Boasiako,Peter Csanyi,2014 Theories of Decentralization and Local Government brings fresh perspective to the debate and comparative analysis of vertical division of power i e processes of decentralization and relations between central and local self governments The multiple author book is

not just one of many similar around the globe as it encompasses contributions from many different academics from not only different countries but also different continents and even more importantly very different political traditions and cultures This way the book deepens and strengthens knowledge of the role of local governments in the contemporary world and brings new value to discussions on the relationship between decentralization and development Contributors include Ahmed Mustafa Elhussein Mansour Hong Pang Abdulfattah Yaghi Jose Neftali Recinos Gariela Miranda Recinos Lee Payne Heather Wyatt Nichol Ed Gibson James Newman Kwame Asamoah Minerva Cruz and Alexandra Tsvetkova

Fiscal Federalism and Political Decentralization Nuria Bosch, José M. Durán, 2008-01-01 This highly original book analyzes political decentralization and fiscal federalism in Canada and Germany both traditional federal countries and in Spain a unitarian country engaged in the last two decades in a process of decentralization The three key issues required for a well designed financing system are analyzed in depth herein namely tax assignment equalization grants i e redistribution of money from the wealthy regions or the national government to poorer regions and the role of regional government in the administration of taxes Fiscal Federalism and Political Decentralization will be of particular interest to academics and researchers of economics public economics public finance and public choice It will also appeal to politicians and policy makers as well as organizations and agencies related to the economy and fiscal federalism

Fiscal federalism in theory and practice Samuel Mäurer, 2022-03-28 Seminar paper from the year 2019 in the subject Economics Finance Johannes Gutenberg University Mainz language English abstract This seminar paper deals with a critical discussion of the economic insight from chapter 8 Decentralization and development of the Handbook on Fiscal Federalism Decentralization is generally defined as the transfer of certain administrative and fiscal functions or powers of a central authority to several local authorities The main advantage of local decentralization is that local governments are more efficient at providing certain public services compared to the higher levels of government Oates 1972 The chapter focuses on the type of decentralization in developing and transition economies on the transfer of political decision making power to subnational levels of government and cases where local community organizations formally participate in the implementation of funded and centrally directed projects It is important to mention that the chapter distinguishes decentralization in the sense of decentralization of political decision making power from administrative delegation of functions of the central government to the local one However the effects of a policy of decentralization may differ sustainably Like the common case when the central government delegates responsibility for social sector expenditure to local authorities in the form of unfunded mandates which results in a closure of the social programmes Decentralization can be used to serve the political power of the central government to dispel some authority when the central control might be threatened by regional interest During the apartheid regime in South Africa decentralization was used as an instrument of central control and racial division But on the other hand it also has positive effects where decentralization is the result of the recent transition from authoritarianism to democracy as in countries such as Brazil or Indonesia Fiscal Federalism in Unitary States Per Molander, 2012-12-06 Decentralism of political power to regions and local government occurs worldwide in response to demands from the periphery Such devolution of power raises a number of problems political financial and legal By gathering together important papers from a series of workshops sponsored by the SNS Constitutional Project and the Center for European Integration Studies this volume presents a number of these problems from a truly interdisciplinary perspective The authors believe that fiscal federalism while originating in formally federal states is relevant also to the analysis of state local relationships in unitary states with some degree of regional or local authority Among the topics they cover are the division of responsibilities and powers of taxation bailouts systems of equalization and state grants as well as problems related to democracy and citizens rights While the book's primary focus is Nordic its international perspective is enhanced by

contributions from Europe Canada and the U S Fiscal Decentralization in Developing Countries Richard Miller Bird,1998
