C. Dier, 2017-06-11 Excerpt from A Book of Winter Sports An Attempt to Catch the Spirit of the Keen Joys of the Winter Season The friction type of ice motor first received serious attention when in 1911 Fred Waters of Red Bank stumbled into a sensation by putting his

runabout on runners with a cogged wheel motor driven It is said that he had no thought of its being unusually Speedy but simply aimed to take advantage of the better and less obstructed surface of the ice as compared with the rough roads The speed of this auto sleigh with an engine of only Six horsepower was so remarkable that in the next winter he took a Ford chassis placed runners where the front wheels were and rear runners on a three foot extension of the back of the Chassis In place of the tires on the rear wheels are about thirty six sharp steel plates which attend to its propulsion when driven by a twenty two and a half horsepower engine This ice sled is driven exactly as one drives an automobile and runs smoothly springs in the front and rear make riding comfortable even at the highest speed Mr Waters believes that he will be able to make almost a mile a minute on clear ice which seems to be about the speed developed so far by the propeller type on Saranac Lake Intense interest is being Shown in the new sport by both veteran ice yachtsmen and automobile owners who were never aboard an ice boat there is no question but that ice motors will soon be thoroughly studied in the manufacturers designing rooms and that motor ice running will head the list of winter sports in which speed is a factor About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
