Kamalipour,2019-07-05 Global Communication A Multicultural Perspective Third Edition is intended to explore inform and incite discussions about globalization and global communication With chapters by some of the foremost global communication scholars this book covers essential concepts of international communication and contemporary and emerging topics **Freedom of Expression and New Information Technologies** Michèle Paré,Peter Desbarats,1998

The fiftieth anniversary of the Declaration of Human Rights coincides with the phenomenon of information technology spreading out to the masses of people Does this phenomenon represent a threat to freedom of expression and to individual and collective rights Or does it represent a tool for freeing speech and democratising behaviour With the support of UNESCO Orbicom the international network of UNESCO chairs in communication linking representatives from the worlds of university and business and professionals in information and communication on all the continents put these questions to twenty one experts and associations Their answers published in this book extend the debate on freedom of expression beyond its geographical and national dimensions and on to cultural ethical ideological and legal ones Their answers leave little room for neutrality or submission They directly challenge the reader to take one of two paths the one leading to a new universal practical real time democracy or the one leading through new forms of ownership to control of how technology is used and of how information circulates Free Expression In The Age Of The Internet Jeremy Lipschultz,1999-12-09

In Free Expression in the Age of the Internet Jeremy Lipschultz investigates the Internet and its potential for profound change analyzing the use of its technology from social political and economic perspectives Lipschultz provides new insights on traditional legal concepts such as marketplace of ideas social responsibility and public interest arguing that from a communication theory perspective free expression is constrained by social norms and conformity Lipschultz explores social limits on free expression by first examining history of print and electronic media law and regulation He utilizes the gatekeeping metaphor the spiral of silence and diffusion theory to explore current data on the Internet He uses Reno v ACLU 1997 as a case study of current First Amendment thinking This book includes recent evidence including samples of content from Internet gossip columnist Matt Drudge and the investigation of President Clinton as it unfolded on the World Wide Web The analysis is related to broader issues about Internet content including commercial and other communication The new technologies raise new questions about legal and social definitions of concepts such as privacy Free expression is explored in this book under the umbrella of a

global commercial economy that places importance on legal rights such as copyright even where those rights limit free flow of ideas The Internet places free expression on two tracks On the one hand corporate players are developing cyberspace as a new mass media On the other hand the Internet is virtual space where individuals have the power to connect and communicate with others in ways never before seen This groundbreaking text advancing new media scholarship uses the most current case studies from the Internet to show free expression in practice today Lipshultz presents a relevant and efficacious social communication theory of free expression which critically examines the necessary factors involved in comprehensive policy analysis and enactment
