Experiencing Geometry on Plane and Sphere David Wilson Henderson, 1994 *Experiencing Geometry* David Wilson Henderson, 2001 For undergraduate level courses in Geometry Henderson invites students to explore the basic ideas of geometry beyond the formulation of proofs The text conveys a distinctive approach stimulating students to develop a broader deeper understanding of mathematics through active participation including discovery discussion and writing about fundamental ideas It provides a series of interesting challenging problems then encourages students to gather their reasonings and understandings of each problem and discuss their findings in an open forum

Mathematics under the Microscope Alexandre Borovik, 2010 The author's goal is to start a dialogue between mathematicians and cognitive scientists He discusses from a working mathematician's point of view the mystery of mathematical intuition why are certain mathematical concepts more intuitive than others To what extent does the small scale structure of mathematical concepts and algorithms reflect the workings of the human brain What are the elementary particles of mathematics that build up the mathematical universe The book is saturated with amusing examples from a wide range of disciplines from turbulence to error correcting codes to logic as well as with just puzzles and brainteasers Despite the very serious subject matter the author's approach is lighthearted and entertaining This is an unusual and unusually fascinating book Readers who never thought about mathematics after their school years will be amazed to discover how many habits of mind ideas and even material objects that are inherently mathematical serve as building blocks of our civilization and everyday life A professional mathematician reluctantly breaking the daily routine or pondering on some resisting problem will open this book and enjoy a sudden return to his or her young days when mathematics was fresh exciting and holding all promises And do not take the word microscope in the title too literally in fact the author looks around in time and space focusing in turn on a tremendous variety of motives from mathematical memes genes of culture to an unusual life of a Hollywood star Yuri I Manin Max Planck Institute of Mathematics Bonn and
