Beginnings of the American People: 1865-1925 Victor Edward White,1926 Outside Lobbying Kenneth
Kollman,2020-11-10 In *Outside Lobbying* Ken Kollman explores why and when interest group leaders in Washington seek to mobilize the public in order to influence policy decisions in Congress In the past political scientists have argued that lobbying groups make outside appeals primarily because of their own internal dynamics to recruit new members for example Kollman however grants a more important role to the need for interest group leaders to demonstrate popular support on particular issues He interviewed more than ninety interest group leaders and policy makers active on issues ranging from NAFTA to housing for the poor While he concludes that group leaders most often appeal to the public when they perceive that their stand has widespread popular support he also shows that there are many important and revealing exceptions to this pattern Kollman develops his theory of outside lobbying through a combination of rational choice modeling and statistical tests that compare public opinion data with data from his interviews about interest groups policy positions and activities The tests reveal that group leaders use outside lobbying to take advantage of pre existing public preferences not to recruit members or to try to generate the mere appearance of grass roots support Kollman s innovative book will clarify the complex relationship among lobbying public opinion and public policy and will set a new standard for interest group research **Historical Outlook** ,1919 **Challenge of Japan Before World War II** Nazli Choucri,Robert C. North,Susumu
Yamakage,2013-08-21 First published in 1993 This book examines the relationships between the economic political and strategic expansion of a country and its tendency towards conflict and war The authors use the example of Japan to demonstrate that it is uneven economic development and the search for basic resources and markets that often set the stage for war and international conflict Thus the pursuit of legitimate national goals for example the expansion of a nation s industrial base may put it into competitive potentially conflicting relationships with countries with similar objectives The names of the authors will attract all International Relations scholars who will know Choucri and North s *Nations in Conflict* and will have been awaiting the outcome of their fifteen years of research on Japan The book is also invaluable reading for advanced undergraduate and postgraduate students of Japan and other Asian area studies political economy and political science **University High School Journal** ,1921 The Journal of Political Economy ,1916 Deals with research and scholarship in economic theory Presents analytical interpretive and empirical studies in the areas of monetary theory fiscal policy labor economics planning and development micro and macroeconomic theory international trade and finance and industrial organization Also covers interdisciplinary fields such as history of economic thought and social economics
