Explaining Religion Criticism And Theory From Bodin To Freud:

Explaining Religion J. Samuel Preus, 1991-07-01 J Samuel Preus traces the development and articulation of a modern naturalistic approach to the study of religion by examining ideas about the origin of religion in the works of nine western thinkers Jean Bodin Herbert of Cherbury Bernard Fontenelle Giambattista Vico David Hume Auguste Comte Edward Brunett Tylor Emile Durkheim and Sigmund Freud He argues that beginning in the sixteenth century increasing critical detachment from theological presuppositions and commitments made it possible for the question of origins to be posed from an altogether non religious point of view This new modernist paradigm was characterized by the conviction that religion could be explained in scientific terms like any other object of critical investigation

The Science of Religion: A Defence Donald Wiebe, 2018-10-16 Donald Wiebe Professor of Philosophy of Religion at Trinity College University of Toronto has spent much of his academic career arguing for a clear demarcation between Theology and Religious Studies The Science of Religion A Defence offers a brilliant overview of Professor Wiebe s contributions on methodology in the academic study of religion of the development of his thinking over time and of his intellectual commitment to a science of religion The work is divided into three parts The first part identifies pertinent connections between religion religious studies and science and why reductionism in the academic study of religion when properly applied can bridge the explanatory gap between the sceptic and the devotee The second part treats conceptual debates in the academic study of religion with particular reference to the place of belief understanding and meaning in the modern study of religion The third part addresses the theological resistance to the scientific study of religion and how that resistance can be overcome Finally two new essays are included a critique on The Preconceptions of a Science of Religion by Anthony J Palma and an accompanying reply by Donald Wiebe The Science of Religion A Defence is an essential resource for both scholarly and non scholarly audiences alike and will be of particular interest to both defenders and critics of a scientific study of religion

Atheism for Beginners Michael Palmer, 2013-02-28 Hurray for Michael Palmer is how Michael Martin the distinguished American philosopher greeted Palmer's *The Atheist's Primer* Lutterworth 2012 *Atheism for Beginners* by providing a coursebook for schools and colleges differs from its predecessor in being designed specifically for teachers and their students Yet although different in focus and format the intention remains the same to reinstate the importance of philosophy within the debate about God's existence and to act as a corrective to the largely Darwinian criticisms levelled against religious belief by Richard Dawkins and the so called new atheists So in Palmer's lively history of atheism extending from the ancient Greeks to the present day we meet the enduring philosophical arguments against God and the great literature in which they are expressed *Atheism for Beginners* is user friendly and presumes no special grounding in philosophy Throughout assistance is given by numerous aids to learning there are exercises marginal notes essay questions bibliographies and a glossary Also provided are fourteen short biographies of famous atheists In these respects Palmer follows the format first presented in his widely read *Moral Problems* of 1991 long established as a core text in the teaching of philosophy In *Atheism for Beginners* Palmer covers the main atheistic arguments discussing issues such as creation morality evil miracles and the motivations of belief Particular attention is paid to the work of Hume Marx Nietzsche and Freud with a special chapter devoted to the development of disproof atheism Atheism is often criticized for being unduly pessimistic that without God there is nothing to look forward to no life after death no final righting of wrongs and no hope of salvation But this Palmer argues is a slander against the atheistic outlook He concludes therefore on a positive note explaining that happiness and personal fulfilment are to be found in the very materialism that religious belief rejects

Love Disconsol'd Timothy P. Jackson, 1999-11-25 Few concepts are more central to ethics than love but none is more subject to false consolation This 1999 book explores several theological philosophical and literary accounts of love focusing on how it relates to matters such as self interest and self sacrifice and invulnerability and immortality Timothy Jackson first considers key aspects of what the Bible says about love then he further examines the meaning of love and sacrifice through a close reading of novels by Fitzgerald and Hemingway Lastly he evaluates how love constrains and is constrained by other traditional moral concepts Throughout Jackson defends the moral priority of what the Christian tradition calls agape He argues that a proper understanding of agapic love rejects both moral relativism and the comfort of believing that good people cannot be harmed or that God causally necessitates every historical action and event When love is thus disconsol'd it neither fears death nor despises life

Martin,Dalibor Papoušek,2001 While the academic study of religion in the former Soviet Union had to contend with an official ideology of scientific atheism such study in the West particularly in the United States was being re invented in the 1960s during the very midst of the Cold War The twenty one contributions to this

volume by scholars from North America Europe Russia and eastern Europe examine the ideological and theological influences on the academic study of religion during the period from 1945 to 1989 and thus raise the question of whether an academic study of religion Religionswissenschaft might be defined in ways that avoid the extremes of both ideology and theology **Beyond Borders** Virgilio P. Elizondo,2000 A celebration of the theology of Virgilio Elizondo that brings together his significant essays previously unpublished in book form along with critical reflections by a range of scholars **Behold the Antichrist** Delos Banning Mckown,2004-05 No Marketing Blurb **Ethical and Political Dilemmas of Modern India** Ninian Smart,Shivesh Chandra Thakur,1993 *An Introduction to the Phenomenology of Religion* James Cox,2010 James Cox provides an easily accessible introduction to the phenomenology of religion which he contends continues as a foundational method for the academic study of religion in the 21st century **Early Judaism** Martin S. McCutcheon,1999 This anthology collects and introduces 30 classic and contemporary readings that investigate the ways in which scholars of religion have grappled with the relations between studying practicing and advocating Writers range from Kant Hume Schleiermacher and Otto to Ninian Smart Mircea Eliade Karen McCarthy Brown and Wendy Doniger O Flaherty *Zygon* ,2008 **Situating Islam** Aaron W. Hughes,2007 The formation of any scholarly discourse is contingent upon the creation of a vocabulary and a set of categories responsible for manufacturing the data that it deems significant or not The discovery of raw data the manufacture of theoretical or interpretive frameworks that make sense of such data and subsequent scholarly conventions responsible for its dissemination are always mediated by particular social ideological and political contexts This book documents these contexts in the creation of the discipline known as Islamic Studies and demonstrates how they have been instrumental in shaping how we think about Islam in both the academy and especially post 9 11 in the media This volume argues that knowledge of Islam has never been innocent or about the simple collection of facts but that the interpretive lenses used to study Islam have always been and continue to be caught up with larger forces e g the reform of Judaism Orientalism identity politics of the 1960s 9 11 the fight against terrorism the creation of a liberal Islam Whereas previous work is content to show the nefarious influence of Orientalism in the creation of Islamic data and the formation of an essentialized Islam *Situating Islam* argues that the opposite approach the construction of an authentic Islam that coincides effortlessly with Western values is equally problematic The work concludes by examining how Islamic data has the potential to help us better understand how we construct and contest religion *Marburg Revisited* Michael Pye,1989
