## Chapter 13: Managing Patient Care Potter: Essentials for Nursing Practice, 8th Edition

---

### MULTIPLE CHOICE

1. A registered nurse works as a case manager in the local hospital. What *primary* role will the nurse be fulfilling?
  - a. Coordinating care for patients with a specific condition
  - b. Only working with primary health care providers
  - c. Directing care of all patients in the hospital setting
  - d. Providing direct care to specific patients

ANS: A

What is unique about case management is that clinicians, either as individuals or as part of a collaborative group, oversee the management of patients with specific case types, focusing on length of stay and improving clinical outcomes (e.g., patients with specific diagnoses presenting complex nursing and medical problems such as heart failure or diabetes). Case managers work with social services, dietitians, and physical therapists to name a few. Case managers do not care for all patients, just a specific case type. Case managers do not provide direct care. Instead they collaborate with and supervise the care that other staff members deliver.

PTS: 1

DIF: Cognitive Level: Applying (Application)

REF: 228

OBJ: Differentiate among the types of nursing care delivery models.

TOP: Nursing Process: Implementation MSC: NCLEX: Management of Care

2. A nurse manager is interested in supporting more involvement of the staff nurses on the unit. What is one approach the nurse manager can take to facilitate this involvement?
  - a. Inform the staff of decisions made.
  - b. Use decentralized management.
  - c. Avoid unit goals.
  - d. Discourage input from other personnel.

ANS: B
