

General environmental noise

Updated May 2019

Article 10(1) of the Environmental Objectives Directive sets out the system of noise assessment by region and then the maximum noise levels permitted in specific circumstances.

Introduction

Generally, all processes generate noise. It is a part of most activities undertaken in almost unlimited range of settings from the ringing of a hammer to the hum of a power station. The reported trouble by individuals and the authorities can be varied to the number of activities that produce it.

In South Australia, economic noise is regulated by the Environment Protection Act 1986 (EPA Act), and by the Environment Protection (Noise) Regulations 2007 (Noise Regs). Section 24 of the EPA Act provides a general environmental duty requiring a person not to undertake an activity which pollutes (pollution includes noise). The environment includes that person's health or reasonable and predictable interference that may be caused to persons or material environmental harm. Consistent with noise being set out in the Noise Regs within the general environmental duty.

The Noise Policy has several noise provisions in relation to the following forms of noise:

- a) construction noise
- b) domestic noise, including a domestic activity involving the use of machinery, tools or other equipment and fixed outdoor machine noise, such as air conditioning and pool pumps
- c) rubbish collection, street sweeping, roadworks, etc.
- d) building services noise systems
- e) fireworks (used in primary production to prevent loss damage to crops)

Domestic noise

Noise from domestic premises can include music and party noise, band and music practice, parties, evening noise related, hammering, and other non-industrial construction noise. Whilst consistent with the enjoyment of an area, by any person living in an otherwise quiet area, the noise becomes environmental harm. Due to the nature of these incidents they do not require a noise measurement and can be automatically assessed by an authorised officer taking into account the time of day and background noise level. SA Police are authorised officers for the purpose of issuing nuisance proceedings and in many instances, nuisance can be referred to police from environmental inspectors, if the noise is occurring during the evening, night or early morning.

If the complaint is about a machine for which maximum permissible noise levels and limits for use have been set, noise levels will need to be measured by an authorised officer. The SA Police will only undertake subjective noise measurements.
