Environmental Separation of Heavy Metals Arup K. SenGupta, 2001-09-26 This new book explains advanced and emerging technologies for removing heavy metals from wastestreams and contaminated sites Separation processes of this type are critical for meeting stringent regulations of priority pollutants especially arsenic mercury and lead which the text treats in depth After explaining the chemistry of heavy metals and their transport in various media the work offers a comprehensive analysis of strategies for separating metals from groundwater wastewater contaminated soils and industrial sludges Both the basics and the applications of techniques such as ion exchange specialized sorbents novel membranes advanced precipitates and electrokinetic processes are presented with a view to current use and potential for future applications such as resource reuse Information in this volume enables engineers and other investigators to adapt and select the best means to remove and in certain instances recover heavy metals **Environmental Separation of Heavy Metals** Arup K. Rivas, Jochen Bundschuh, 2016-02-17 Due to increasing demand for potable and irrigation water water suppliers have to use alternative resources. They either have to regenerate wastewater or deal with contaminated surface water This book brings together the experiences of various experts in preparing of innovative materials that are selective for arsenic and chromium removal and in **Nanotechnology in Industrial Wastewater Treatment** Dr. Arup Roy, Jayanta Bhattacharya, 2015-01-15 Nanotechnology in Industrial Wastewater Treatment is a state of the art reference book The book is particularly useful for wastewater technology development laboratories and organizations All professional and academic areas connected with environmental engineering nanotechnology based wastewater treatment and related product design are incorporated and provide an essential resource. The book describes the application and synthesis of Ca based and magnetic nano materials and their potential application for removal treatment of heavy metals from wastewater Nanotechnology in Industrial Wastewater Treatment discusses the rapid wastewater treatment methods using Ca based nanomaterials and magnetic nanomaterials This is an emerging area of new science and technology in wastewater treatment The main audiences for the book are water industry professionals research scholars and students in the area of Environmental Engineering and Nanotechnology Authors Dr Arup Roy Department of Mining Engineering Geo

Environmental Lab Indian Institute of Technology Kharagpur India and Professor Jayanta Bhattacharya Department of Mining Engineering Geo Environmental Lab Indian Institute of Technology Kharagpur India **Water Treatment Unit Processes** David W. Hendricks, 2018-10-03 The unit process approach common in the field of chemical engineering was introduced about 1962 to the field of environmental engineering An understanding of unit processes is the foundation for continued learning and for designing treatment systems. The time is ripe for a new textbook that delineates the role of unit process principles in environmental engineering Suitable for a two semester course Water Treatment Unit Processes Physical and Chemical provides the grounding in the underlying principles of each unit process that students need in order to link theory to practice Bridging the gap between scientific principles and engineering practice the book covers approaches that are common to all unit processes as well as principles that characterize each unit process Integrating theory into algorithms for practice Professor Hendricks emphasizes the fundamentals using simple explanations and avoiding models that are too complex mathematically allowing students to assimilate principles without getting sidelined by excess calculations Applications of unit processes principles are illustrated by example problems in each chapter Student problems are provided at the end of each chapter the solutions manual can be downloaded from the CRC Press Web site Excel spreadsheets are integrated into the text as tables designated by a CD prefix Certain spreadsheets illustrate the idea of scenarios that emphasize the idea that design solutions depend upon assumptions and the interactions between design variables The spreadsheets can be downloaded from the CRC web site The book has been designed so that each unit process topic is self contained with sidebars and examples throughout the text Each chapter has subheadings so that students can scan the pages and identify important topics with little effort Problems references and a glossary are found at the end of each chapter Most chapters contain downloadable Excel spreadsheets integrated into the text and appendices with additional information Appendices at the end of the book provide useful reference material on various topics that support the text This design allows students at different levels to easily navigate through the book and professors to assign pertinent sections in the order they prefer The book gives your students an understanding of the broader aspects of one of the core areas of the environmental engineering curriculum and knowledge important for the design of treatment systems Arsenic Metallurgy Ramana G. Reddy, V. S. Ramachandran, 2005-02 Arsenic has long been a problem associated with the extraction of nonferrous metals During the last decade a combination of lower grade ores and environmental concerns has resulted inaccelerated technological developments to meet arsenic challenges This volume presents the necessary technologies to further advancearsenic metallurgy Treatment of high arsenic containing ores and metallurgical streams and wastes are given particular attention Arsenic metallurgical reactions process and environmentaltechnologies are also reviewed From ahref http www tms org Meetings Annual 05 AnnMtg05Home htmltarget blank2005 TMS Annual Meeting a to be held in Chemical Engineering Progress, 2006 SanFrancisco February 13 17 2005 Pollution Abstracts ,1993 Indexes material
