## **Dkcrc Aboriginal Knowledge And Ip Protocol Community Guide:**

Report on Torres Strait Fisheries Research Protocols Martin Nakata,Vicky Nakata,2011-01-01 At its 45th meeting in 2008 the Torres Strait Scientific Advisory Committee TSSAC set down for discussion the need for guiding protocols that researchers adopt when working in the Torres Strait 45 6 1 The Committee considered the current processes and procedures for fisheries research in the Torres Strait and discussed approaches developed for other organisations At the following meeting members agreed to commission a review of current approaches and the development of a single source web based document that would provide guiding protocols for adoption by researchers when working in the Torres Strait This book is the result of the commissioned work Indigenous Governance of Traditional Knowledge Neva Collings,2023-08-17 This

book addresses the issue of Indigenous peoples participation in genetic resource access and benefit sharing and associated traditional knowledge for self determination Genetic resources from nature are increasingly used in global biodiscovery research and development but they often use Indigenous peoples traditional knowledge without their consent and without sharing the benefit The Nagoya Protocol is an instrument of the Convention on Biological Diversity intended to ensure Indigenous peoples traditional knowledge is used with their prior and informed consent or approval and entails benefit sharing on mutually agreed terms Many countries with significant Indigenous populations have signed the Nagoya Protocol and are currently grappling with implementation of its provisions This book takes up a case study of Australia to demonstrate how Indigenous community governance in settler states can serve as a path to implementing the Nagoya Protocol Australia s access and benefitsharing framework is globally hailed as best practice offering lessons for other countries implementing the Nagoya Protocol Focusing on two Indigenous community organisations in Australia the book establishes a unique evaluative framework for analysing and differentiating the governance arrangements used by Indigenous communities for facilitating decision making related to traditional knowledge This book will appeal to scholars working in the areas of international environmental law human rights biotechnology law and Indigenous legal issues as well as those directly engaged in implementing access and benefit sharing measures and developing law reform strategies **Concepts and Values in**

**Biodiversity** Dirk Lanzerath,Minou Friele,2014-01-23 Biodiversity may refer to the diversity of genes species or ecosystems in general These varying concepts of biodiversity occasionally lead to conflicts among researchers and policy makers as each of them require a customized type of protection strategy This book addresses the questions surrounding the merits of conserving an existing situation evolutionary development or the intentional substitution of one genome species or ecosystem for another Any practical steps towards the protection of biodiversity demand a definition of that which is to be protected and in turn the motivations for protecting biodiversity Is biodiversity a necessary model which is also useful or does it carry intrinsic value Debates like this are particularly complex when interested parties address it from different conceptual and moral perspectives Comprised of three parts each complemented by a short introductory paragraph this collection presents a

variety of approaches to this challenge The chapters cover the perspectives of environmental scientists with expertise in evolutionary environmental biology systematic zoology and botany as well as those of researchers with expertise in philosophy ethics politics law and economics This combination facilitates a truly interdisciplinary debate by highlighting hitherto unacknowledged implications that inform current academic and political debates on biodiversity and its protection The book should be of interest to students and researchers of environment studies biodiversity environmental philosophy ethics and management

**Indigenous People's Innovation** Peter Drahos, Susy Frankel, 2012-08-01 Traditional knowledge systems are also innovation systems This book analyses the relationship between intellectual property and indigenous innovation The contributors come from different disciplinary backgrounds including law ethnobotany and science Drawing on examples from Australia New Zealand and the Pacific Islands each of the contributors explores the possibilities and limits of intellectual property when it comes to supporting innovation by indigenous people
