### Estructura de clases agraria y desarrollo económico en la Europa preindustrial

Robert Brenner hace hincapié en que los modelos económicos están destinados al fracaso, ya que según él:

"es la estructura de relaciones de clase, del poder de clase lo que determina el modo y el grado en que los cambios concretos que se operan desde una perspectiva demográfica o comercial afectan la distribución de la renta y el desarrollo económico a largo plazo, y no al contrario."

Dicho de otro, lo que prevalece en importancia es la forma en la que "funcionan" las estructuras de clase, ya sea refinándose a la relación de propiedad del productor directo con respecto a los medios de producción como a la manera en la que se extrae el excedente y tienden a poner límites a la forma en la que los aspectos demográficos o mercantiles inciden en el desarrollo económico.

Antes que nada, Brenner se propone refutar las teorías demográficas y mercantiles.

### El modelo demográfico

El modelo malthusiano merece atención, ya que tiene lógica: la subdivisión y la superpoblación de las tenencias y el agotamiento de los recursos naturales suponen hambre y escasez, lo que produce un descenso demográfico, y luego de ello la vuelta a la condición de equilibrio. Aunque parezca infalible, el modelo malthusiano choca con el problema de la distribución de la tierra y la manera en la que estaban establecidas las relaciones de propiedad, tanto del campesino como del señor, y cual era la naturaleza de las relaciones y el poder de clase. El modelo demográfico está condicionado porque no explica la distribución del producto de la tierra y la relación entre el señor y el campesino.

### El modelo mercantil

Para oponerse a este modelo, Brenner recurre a Postan, que demostró que durante el periodo de comienzo del mercado mundial de granos, se dio un mayor grado de sujeción del campesinado en el este de Europa, al mismo tiempo que se desarrollaba el capitalismo en el oeste. La interpretación mercantil falla en que ignora la capacidad del señor para aplicar exacciones arbitrarias. La alteración del tipo de renta no implicó la finalización del poder del señor sobre el campesino, sino más bien su continuidad.

Crises and Transformation in the Mediterranean World Jordi Catalan Vidal, 2023-08-16 This edited collection presents an economic history of Catalonia and its economic crises from Roman times to the political difficulties of the present day It considers how the strong identity of the Catalan people has been reinforced in critical episodes such as the commercial revolution of the Late Medieval Age the 1640 rebellion the Succession War of 1705 1714 the industrial revolution of the eighteenth and nineteenth centuries and the strong repression during early Francoism The book also explores how historical parallels from Catalonia's past might shed light on the long term consequences of the Great Recession of 2007-9 and recovery in the EU showing how the typical Mediterranean approach of adjusting to crises by depreciating currencies and expanding public deficits has been less straightforward during the most recent financial crisis A particularly deep slump has contributed to fostering the claim for independence of Catalonia in recent times echoing larger dissatisfaction with EU monetary policy With a comprehensive overview of major events in Catalanian economic history and their broader implications to European political economy and development this book will be of interest to students and academics in economic history social history and monetary economics
