Health, Disease and Society in Europe, 1500-1800 Peter Elmer, Ole Peter Grell, 2004-03-09 The period from the Renaissance to the Enlightenment constitutes a vital phase in the history of European medicine Elements of continuity with the classical and medieval past are evident in the ongoing importance of a humor based view of medicine and the treatment of illness At the same time new theories of the body emerged in the seventeenth and eighteenth centuries to challenge established ideas in medical circles In recent years scholars have explored this terrain with increasingly fascinating results often revising our previous understanding of the ways in which early modern Europeans discussed the body health and disease In order to understand these and related processes historians are increasingly aware of the way in which every aspect of medical care and provision in early modern Europe was shaped by the social religious political and cultural concerns of the age

Encyclopedia of Plague and Pestilence George C. Kohn, 2007 Encyclopedia of Plague and Pestilence Third Edition is a comprehensive A to Z reference offering international coverage of this timely and fascinating subject This updated volume provides concise descriptions of more than 700

Civic Politics in the Rome of Urban VIII Laurie Nussdorfer, 2019-04-23 In this colorful depiction of daily political life in Baroque Rome Laurie Nussdorfer argues that the lay persons managed to sustain a civic government under the increased papal absolutism of Urban VIII 1623 1644 who oversaw both sacred and secular life Focusing on the S P Q R the Senate and the Roman People which was ministered from the capitoline Hill she shows that it provided political representation for lay members of the urban elite carried out the work of local government and served as a symbol of the Roman voice in public life Through a detailed study of how civic authorities derived their sense of legitimacy and how lay subjects maneuvered in informal and disguised ways to block or criticize the papal regime the author advances a new way of conceiving politics under an absolute ruler As Nussdorfer analyzes the complex interactions between the lay administration and Urban VIII and his family the papal administration and Romans of the upper and lower classes she also provides fresh insights into the actual practice of early modern government She takes the plague threat of the early 1630s the War of Castro 1641 1644 and the interregnum following the pope's death as important test cases of the state's power in times of crisis Laurie Nussdorfer is Assistant Professor of History and Letters at Wesleyan University Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover

editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Kabbalah, Magic, and Science David B. Ruderman, 1988 In describing the career of Abraham Yagel a Jewish physician kabbalist and naturalist who lived in northern Italy from 1553 to about 1623 David Ruderman observes the remarkable interplay between early modern scientific thought and religious and occult traditions from a wholly new perspective that of Jewish intellectual life Whether he was writing about astronomical discoveries demons marvelous creatures and prodigies of nature the uses of magic or reincarnation Yagel made a consistent effort to integrate empirical study of nature with kabbalistic and rabbinic learning Yagel's several interests were united in his belief in the interconnectedness of all things a belief shared by many Renaissance thinkers that turns natural phenomena into signatures of the divine unity of all things Ruderman argues that Yagel and his coreligionists were predisposed to this prevalent view because of occult strains in traditional Jewish thought He also suggests that underlying Yagel's passion for integrating and correlating all knowledge was a powerful psychological need to gain cultural respect and acceptance for himself and for his entire community especially in a period of increased anti-Semitic agitation in Italy Yagel proposed a bold new agenda for Jewish culture that underscored the religious value of the study of nature reformulated kabbalist traditions in the language of scientific discourse so as to promote them as the highest form of human knowledge and advocated the legitimate role of the magical arts as the ultimate expression of human creativity in Judaism This portrait of Yagel and his intellectual world will well serve all students of late Renaissance and early modern Europe

Community, Urban Health and Environment in the Late Medieval Low Countries Janna

Coomans, 2021-08-26 By exploring the uniquely dense urban network of the Low Countries Janna Coomans debunks the myth of medieval cities as apathetic towards filth and disease Based on new archival research and adopting a bio-political and spatial material approach Coomans traces how cities developed a broad range of practices to protect themselves and fight disease Urban societies negotiated challenges to their collective health in the face of social political and environmental change transforming ideas on civic duties and the common good Tasks were divided among different groups including town governments neighbours and guilds and affected a wide range of areas from water fire and food to pigs prostitutes and plague By studying these efforts in the round Coomans offers new comparative insights and bolsters our understanding of the importance of population health and the physical world infrastructures flora and fauna in governing medieval cities

Salutogenic Urbanism Mohammad Gharipour, Anatole Tchikine, 2023-08-31 This book offers a new salutogenic perspective on the development of early modern cities by exploring profound and complex ways in which architecture and landscape design served to promote public health on an urban scale Focusing on fifteenth through nineteenth century Europe it addresses the histories of spaces and institutions that supported salubrious living highlighting the intersections of medical theory government policy and architectural practice in designing improving and monumentalizing the infrastructure

of sanitation and healthcare Studies in this book highlight the joint role of design thinking and scientific practice in reforming the facilities for treating and preventing disease the impact of cross cultural exchange on early modern strategies of urban improvement and the creation of new therapeutic environments through state communal and private initiatives concerned with the preservation of physical and mental health from recreational landscapes to spa resorts

The Structure of Plagues and Pestilences in Early Modern Europe Edward A. Eckert,1996 This book presents the most in depth study ever undertaken of how plague and other infectious diseases affected populations in Central Europe between 1560 and 1640 Based on quantitative data gleaned from over 800 parish registers the extended time period covered has allowed for the comparison of seven successive plague cycles Wide variations between the characteristics of local and regional epidemics were discovered during this extensive research and this publication examines the contributing factors behind these effects such as settlement patterns trade routes and extreme changes in weather It also uncovers evidence of the existence of two separate fields of activity responsible for the distribution of outbreaks and flow of the disease maritime and regional inland Despite such statistical disparities the author concludes that plague waves while sensitive to such factors were resilient and eventually overcame any obstacles in their path As a well documented study it will be of immense value to medical historians epidemiologists and microbiologists public health and tropical disease researchers and social historians and demographers

Art, Piety and Destruction in the Christian West, 1500-1700 Virginia Chieffo Raguin,2010 Addresses the impact of religious tensions on art design and architecture in the early modern world This title examines famous works of art such as Kraft s Eucharistic Tabernacle the less studied objects including church plate and vestments stained glass graffiti and Mexican images of St Anne

Understanding the Politics of Pandemic Scares Mika Aaltola,2012-01-30 Reactions to pandemics are unlike any other global emergency with an emphasis on withdrawal and containment of the sight of the infected Dealing with the historical and conceptual background of diseases in politics and international relations this volume investigates the global political reaction to pandemic scares By evaluating anxiety and the political response to pandemics as a legitimisation of the modern state and its ability to protect its citizens from infectious disease Understanding the Politics of Pandemic Scares examines the connection between international health governance and the emerging Western liberal world order The case studies including SARS Bird Flu and Swine Flu provide an understanding of how the world order global health governance and people s bodies interact to produce scares and panics Aaltola introduces an innovative new concept of politosomatics based on the relationship that links individual stress strain and fear with global circulations of power to evaluate increasingly global bio political environments in which pandemics exist This book will be of interest to students and researchers of International Relations Global Health International Public Health and Global Health governance

Plagues, Poisons, and Potions William G. Naphy,2002 With the 16th and 17th Century outbreaks of the Plague came the arrests and executions of many hospital workers who were accused of conspiring to spread the disease Plagues Poisons and Potions

contains a detailed study of this fascinating phenomenon associated with the Plague It examines the courts and the part played by torture as well as considering the socio economic conditions of the workers highlighting an early modern form of class warfare Reformation Europe De Lamar Jensen,1992 For full description see Renaissance Europe Age of Recovery and Reconciliation 2 e **Living with the Black Death** Lars Bisgaard,Leif Søndergaard,2009 Between 1347 and 1352 an unknown and deadly disease only much later known as the Black Death swept across Europe leaving an estimated 30 50 % of the population dead Contemporaries held various views as to what was the final ultimate cause of this disaster Many probably most thought it was God s punishment for the sins of humankind others thought it was basically a natural phenomenon caused by a fateful constellation of the heavenly bodies Recurrent plague epidemics racked Europe from 1347 to the early 18th century Populations were repeatedly struck with more or less disastrous consequences but every time people recovered and resumed their activities Their experiences made them try various measures to protect themselves and prevent outbreaks or at least to minimize the consequences In short they were Living with The Black Death This book deals with plague particularly in Northern Europe in various aspects epidemiology pattern of dispersion demography social consequences religious impact and representation in pictorial art and written sources British Paperbacks in Print ,1984
