Figuratively Speaking Robert J. Fogelin, 2011-02-24 In this updated edition of his brief engaging book Robert J Fogelin examines figures of speech that concern meaning irony hyperbole understatement similes metaphors and others to show how they work and to explain their attraction Building on the ideas of Grice and Tversky Fogelin contends that figurative language derives its power from its insistence that the reader participate in the text looking beyond the literal meaning of the figurative language to the meanings that are implied With examples ranging from Shakespeare John Donne and Jane Austen to e e cummings Bessie Smith and Monty Python Fogelin demonstrates that the intellectual and aesthetic force of figurative language is derived from the opportunity it provides for unlimited elaboration Fogelin presents a modern restatement of the view first put forward by Aristotle that metaphors are to be treated as elliptical similes He then offers a detailed defense of this comparativist view of metaphors in response to criticisms that have been brought against it by a series of eminent philosophers This new edition is updated to reflect more recent work on the topic
