for Innocence addresses this question by examining the backlash against affirmative action in the late 1980s and early 1990s just as courts universities and other institutions began to end affirmative action programs This book recounts the stories of elite legal professionals at a large corporation with a federally mandated affirmative action program as well as the cultural narratives about race gender and power in the news media and Hollywood films Though most white men denied accountability for any racism in the workplace they recounted ways in which they resisted whether wittingly or not incorporating people of color or white women into their workplace lives Drawing on three different approaches ethnography narrative analysis and fiction to conceptualize the complexities and ambiguities of race and gender in contemporary America this book makes an innovative pedagogical tool

Women in Scholarly Publishing Anna Kristina Hultgren, Pejman Habibie, 2023-09-29 Women in Scholarly Publishing explores the under researched topic of gender and scholarly publishing While often considered separately the relationship between gender and scholarly publishing has been neglected Bringing together experts across applied linguistics this book brings to the fore the challenges and opportunities faced by female academics in both Anglophone and non Anglophone contexts as they participate in the production and dissemination of knowledge Contributors show how female scholars production and dissemination of knowledge intersect with gendered structures and disciplinary cultures in complex ways The key strands of work that this volume seeks to bring together include essentialism in gender studies and alternative perspectives on how gender should be viewed and studied in knowledge production and dissemination the specific ways in which the labour and conditions surrounding scholarly publication are gendered or perceived as gendered the examination of discourses texts and genres from a gender perspective and the continuing gendered and gendering impacts on career trajectories of women academics While women s barriers are documented across geopolitical contexts the book also shows how norms policies and practices can be challenged and alternative futures imagined The book will be of interest to researchers practitioners institutional decision makers writing mentors early career scholars and graduate students in a variety of fields

Working the Ruins Elizabeth St. Pierre, Wanda Pillow, 2002-05-03 From some of the leading feminist scholars in education comes a collection of writings discussing how they use feminist poststructural theory in their classrooms and research Drawing on real life situations in their work they show how using this theory has transformed their work Topics covered include theory in everyday life ethnography writing the body emotions in the classroom qualitative research and gossip as a counter discourse The range of topics processes and styles presented provides the reader with a variety of examples illustrating the diversity and power of the effects of poststructural theory as well as showing the possibilities of work still to be done

*From Meaning of Working to Meaningful Lives: The Challenges of Expanding Decent Work* Annamaria Di Fabio, David L. Blustein, 2016-09-21 This Research Topic explores issues that are central to the continued relevance of organizational and vocational psychology and equally central to the well being of individuals and communities The cohering theme of this publication revolves around the question of how

people can establish meaningful lives and meaningful work experiences in light of the many challenges that are reducing access to decent work. Another essential contextual factor that is explored in this volume is the Decent Work Agenda International Labour Organization 2008 which represents an initiative by the International Labour Organization. In this book we hope to enrich the Decent Work Agenda by infusing the knowledge and perspectives of psychology into contemporary discourses about work and well being. Another inspiration for this project emerged from the UNESCO Chair in Lifelong guidance and counseling recently established in Poland in 2013 under the leadership of Jean Guichard which has focused on advancing research and policy advocacy about decent work. This new era calls for an innovative perspective in constructing decent work and decent lives: the passage from the paradigm of motivation to the paradigm of meaning where the sustainability of the decent life project is anchored to a meaningful construction. During this period when work is changing so rapidly leaving people yearning for a sense of connection and meaning it is fundamental to create a framework for an explicitly psychological analysis of decent work.

Building Mental Resilience in Children: Positive Psychology, Emotional Intelligence, and Play Ioannidou, Louiza, Argyriadi, Agathi, 2024-08-09. Mental resilience in children is an essential aspect of childhood well being and long term success. Positive psychology, emotional intelligence and play are critical when nurturing this resilience and building mental strength. Emotional intelligence may help children recognize and manage their emotions effectively while preparing them to overcome personal challenges. Play in teaching and learning may also serve as an avenue for social skill development, problem solving and emotional regulation. More research into the effects of psychology and play in childhood development is needed to correlate the relationship between mental resilience and positive child psychological practices. Building Mental Resilience in Children: Positive Psychology, Emotional Intelligence, and Play explores the effectiveness of psychology, play, pedagogy and emotional intelligence practices in improved childhood development. The practice of mental resilience in K-12 educational settings is further examined through a psychosocial lens. This book covers topics such as mental health and wellness, sociolinguistics and school settings and is a useful resource for education professionals, teachers, academicians, sociologists, psychologists, medical professionals, researchers and scientists.

Handbook of Feminist Research Sharlene Nagy Hesse-Biber, 2007. The topic of feminist research has too often been neglected in standard research methods books. The Handbook of Feminist Research represents the establishment of a new tradition or paradigm in viewing how the research process is implemented. Feminist researchers bring unique epistemological and methodological perspectives to the research process. Feminists' approach to methodology allows for new types of questions about women's lives and those of other marginalized groups to be addressed within their respective fields of research. This Handbook stresses the interconnections between epistemology, methodology and methods. They are not de-linked from each other but work together in dynamic ways to produce new knowledge and this openness.

itself is also characteristic of how feminist researchers approach their work Feminists engage synergistically with all three aspects of the research process epistemology methodology and method Through a synergistic connection between these elements of research epistemology methodology and method we find that feminist research often shapes new research endeavors that are greater than the sum of their parts In other words while traditional research employs these components of research the synergistic engagement of these components in feminist research questions the status quo aiming to raise our consciousness about how we do research Looking at the selections provided in this Handbook we are able to look at feminist research its implementation of synergistic use of epistemology methodology and method and the resulting qualities of feminist research in practice

Women Deans Carol Isaac, 2007-04-26 The purpose of Professor Isaac's study is to determine how five women leaders from male dominated colleges and five from female dominated fields achieved and maintained their roles Specifically Professor Isaac interviewed these women to examine their definitions of leadership The term leadership metaphorically embodies a gendered division of labor where institutions are dominated by masculine structures This research provides a better understanding of the local context of societal relationships as men do not simply oppress women but women can negotiate power and become leaders Interviewees were asked questions about their backgrounds and how they use power in their daily lives Results showed that masculine descriptions of leadership predominated but these women stressed cooperation and service in their own definitions of leadership and were uncomfortable with authoritative power The interviewees desired to produce power through delegation and shared governance but also controlled power deliberately Their expressions of power resided in convincing faculty of organizational ownership Women leaders who avoided aggressive strategies suffered fewer social consequences
