Fifty Key Thinkers In Psychology Fifty Key Thinkers In Psychology:

Fifty Key Thinkers in Psychology Noel Sheehy, 2003-09-02 Fifty Key Thinkers in Psychology introduces the life thought and work of some of the most influential figures who have shaped and developed modern psychology. It features accessibly written and fully cross referenced entries on such figures as Sigmund Freud, Noam Chomsky, Carl Jung, Ivan Pavlov, Jean Piaget, Anne Anastasi, Konrad Lorenz, Hans Eysenck and William James. This fascinating and informative guide is an invaluable resource for those studying working in or who simply want to find out more about psychology. Fifty Key Thinkers in Psychology Noel Sheehy, Alexandra Forsythe, 2013-01-01 Now in a fully updated second edition, Fifty Key Thinkers in Psychology examines the life work and influence of some of the most prominent classic and contemporary psychologists and examines their contributions to the field as a whole. Incorporating 20 new entries which cover the field of psychology and related influential disciplines, this text includes the following key thinkers: Sigmund Freud, Emile Durkheim, Alphonse Chapais, Karen Horney, Elizabeth Loftus, Benoit Mandelbrot, Jean Piaget, Arthur Koestler, John Bowlby, Hugo Munsterberg, Abraham Maslow, Noam Chomsky. Now organised around schools of thought, lending context to each entry with lists of major works and updated further reading throughout, this text is an essential reference guide for all students of psychology. Emotional Amoral Egoism Nayef R.F. Al-Rodhan, 2022-01-01 What makes us who we are? Are we born good or evil? Do we have free will? What drives our behaviour and why? Can technology change what it means to be human? In this thoroughly revised second edition of *Emotional Amoral Egoism*, Professor Nayef Al Rodhan demonstrates the impact of our innate predispositions on key issues from conflict, inequality and transcultural understanding to Big Data, fake news and the social contract. However, it is the societies we live in and their governance structures that largely determine how we act on our innate predispositions. Consequently, Al Rodhan proposes a new and sustainable good governance paradigm which must reconcile the ever-present tension between the three attributes of human nature: Emotional Amoral Egoism and the nine critical needs of human dignity. This book is a perfect resource for enlightened readers, academics and policy makers interested in how our innate instincts and tendencies shape the world we live in and how the interplay between neurophilosophy and policy can be harnessed for pragmatic and sustainable peace, security and prosperity solutions for all at all times and under all circumstances. *Use Your Head* Dr Daniel Freeman, Jason Freeman, 2010-05-08 Ever wondered what goes on up there? Why do we think, feel and act in the way we do? What makes us happy or sad, angry or anxious? The Freeman brothers unravel the secrets of the mind and explain the scientific facts behind our behaviour. Armed with key psychological insights, you'll be able to apply them to everyday situations and understand why we are attracted to certain people or remember faces rather than names. Having trouble sleeping? Suffering from panic attacks? *Use Your Head* will pin point your symptoms and give you practical advice on how to overcome these difficulties. Clear, concise and immediately relevant, this is essential reading. **Library Journal**, 2003 Includes beginning Sept 15 1954 and on the 15th of each month Sept-May a special section School library journal ISSN
