

WHAT TO DO WHEN YOU GET A NEW VENDER

- PUT IT TO WORK -

LEVEL THE VENDER

Level the vender. When the vender is level then the door can be opened to any position and it will not move by itself. Try it half closed, straight open and wide open before you decide that the vender is level.

Make sure that all of the leveling screws are touching the floor.

Level the Vender

ELECTRIC POWER NEEDED

Look at the serial number plate on the right side to find out what the vender's power needs are. Be sure that the vender gets the right power.

The vender uses 115 volts single phase, 60 cycle, alternating current. The voltage must never be lower than 110 or above 120.

GROUND THE VENDER

This vender is made with a three prong plug on the supply cord. It grounds when the plug is put into a three prong outlet. If there is no ground outlet near the vender, use a two prong adapter. If a two prong adapter is used, make sure the adapter's ground wire is connected to a good ground.

Ground the Vender
