Migration and Development in Africa Steve Tonah,Mary Boatemaa Setrana,John A. Arthur,2017-08-28 There are only a few studies that analyze the complex relationship between Migration and development in Africa The book presents the main trends in African migration since the last two decades It analyzes the major migration trends the various migration hubs across the continent and the underlying factors explaining the changing nature of migration across the continent A few of the chapters in the book examine the phenomenon of migration from a national perspective by focusing on migration trends in countries such as Ghana Cameroon Kenya and Nigeria Two chapters examine the migration links between Africa and Europe with one of them focusing on the political links between Ghana and the Netherlands while the other focuses on economic exchanges between the Cameroonian diaspora in Germany and selected groups and organizations in Cameroon The uniqueness of this book lies in the varied disciplinary viewpoints used by the authors in explaining the phenomenon of migration and development in Africa The authors are specialists in the fields of sociology anthropology geography history philosophy and migration studies Examining migration from so many different perspectives enriches the analysis and brings in new insights that would otherwise have been missing with the use of a single disciplinary perspective The book

recommends the need for policy coordination by national governments of both origin and destination countries to manage the size and composition of migrants Most migrant receiving countries prefer to receive professionals and persons with the required skills and training while keeping out the bulk of untrained and lowly skilled persons The result of this is that most migrants leave their countries and enter their destination countries illegally swelling the numbers of undocumented immigrants

**Exploring Silence and Absence in Discourse** Melani Schröter,Charlotte Taylor,2017-12-18 This book fills a significant gap in the field by addressing the topic of absence in discourse It presents a range of proposals as to how we can identify and analyse what is absent and promotes the empirical study of absence and silence in discourse The authors argue that these phenomena should hold a more central position in the field of discourse and discuss these two topics at length in this innovative edited collection It will appeal to students and scholars interested in discourse analysis and critical discourse analysis

**Just Security in an Undergoverned World** William Durch, Joris Larik, Richard Ponzio, 2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity's very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity's future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors It offers just security as a new framework for charting innovating solutions and strategies for effective and essential global governance

**Negotiating Migration in the Context of Climate Change** Nash, Sarah, 2019-09-30 Assessing migration in the context of climate change Nash draws on empirical research to offer a unique analysis of policy making in the field This detailed account is a vital step in understanding the links between global discourses on human mobilities climate change and specific policy responses An important contribution to several ongoing debates in academia and beyond

**Life Adrift** Andrew Baldwin, Giovanni Bettini, 2017-05-24 Life Adrift critically engages with two of the most defining issues of our contemporary global political economy migration and climate change In their own right both are discrete areas of politics theory practice and resistance But as climate and migration are increasingly imagined together as a singular relation they are giving rise to new horizons of meaning in politics philosophy media art and literature Life Adrift is a collection of essays from across the interpretive social sciences and humanities which treats climate change and migration as a relation that demands theoretical and historical explanation rather than a problem requiring technical and expert solutions The result is a unique collection offering readers a means for reconceptualising migration and environmental changes as a site of politics and of political possibility Along the way it addresses a range of topics current in

cultural and political theory including democracy place neoliberalism humanism materiality borders affect race and sexuality If climate change stands to redistribute humans and material across the globe then Life Adrift offers a set of critical resources for analysing this coming phenomenon and reimagining what it might mean to be political in a fully immanent world of bodies in flux      *Routledge Handbook of Environmental Displacement and Migration* Robert McLeman,François

Gemenne,2018-03-09 The last twenty years have seen a rapid increase in scholarly activity and publications dedicated to environmental migration and displacement and the field has now reached a point in terms of profile complexity and sheer volume of reporting that a general review and assessment of existing knowledge and future research priorities is warranted So far such a product does not exist The Routledge Handbook of Environmental Displacement and Migration provides a state of the science review of research on how environmental variability and change influence current and future global migration patterns and in some instances trigger large scale population displacements Drawing together contributions from leading researchers in the field this compendium will become a go to guide for established and newly interested scholars for government and policymaking entities and for students and their instructors It explains theoretical conceptual and empirical developments that have been made in recent years describes their origins and connections to broader topics including migration research development studies and international public policy and law and highlights emerging areas where new and or additional research and reflection are warranted The structure and the nature of the book allow the reader to quickly find a concise review relevant to conducting research or developing policy on particular topics and to obtain a broad reliable survey of what is presently known about the subject      **Environmental Conflicts, Migration and Governance** Tim

Krieger,Diana Panke,Michael Pregernig,2020-01-29 EPUB and EPDF available Open Access under CC BY NC ND licence The globalized era is characterized by a high degree of interconnectedness across borders and continents and this includes human migration Migration flows have led to new governance challenges and at times populist political backlashes A key driver of migration is environmental conflict and this is only likely to increase with the effects of climate change Bringing together world leading researchers from across political science environmental studies economics and sociology this urgent book uses a multifaceted theoretical and methodological approach to delve into core questions and concerns surrounding migration climate change and conflict providing invaluable insights into one of the most pressing global issues of our time

Research Handbook on Climate Change, Migration and the Law Benoît Maye,François Crépeau,2017-10-27 This comprehensive Research Handbook provides an overview of the debates on how the law does and could relate to migration exacerbated by climate change It contains conceptual chapters on the relationship between climate change migration and the law as well as doctrinal and prospective discussions regarding legal developments in different domestic contexts and in international governance      *Climate Change and Securitization of Migration* Sonali Narang,2017-10-04 Master s Thesis from the year 2011 in the subject Earth Science Geography Geopolitics Panjab University language English abstract Human

beings have always migrated in search of better opportunities and better life. Migrations are also well tested strategies followed by various communities to adapt to various calamities and disasters. Most of civilizations e.g. ancient Egyptian and Indus Valley civilizations have come up as a result of people migrating to river valleys. It was only with the emergence of modern nation states system particularly after the treaty of Westphalia that new notion of legality and illegality got attached to the process of migration. Boundaries became rigid and exclusive and the flows of people became an issue of Others and Othering. In short the history of mobility is much longer than the history of Westphalian territoriality and borders. In the present era climate change is becoming the defining factor in human migration. The current dominant geopolitical narratives and framings of climate change tend to focus on the impacts of climate change on potential drivers of conflict such as population movements, border disputes and access to food, water, energy and other scarce resources. It is against the backdrop of a whirlpool of highly imaginative and alarmist geographies of a catastrophic climate change that a new and highly contested concept of climate refugee has emerged. Those who are forced to leave their native land by the global climate change are now described as climate migrants for want of a better term. Millions of people around the globe are said to be at risk of displacement due to climate change being forced to leave their homelands temporarily or permanently. It is believed that nine out of every ten disasters are somehow related to climate change. It has become an accepted fact among the international community that climate change is going to result in large number of displacement. The Inter Governmental Panel on Climate Change (IPCC) has minced no words in warning that The impacts of climate change on Asia will place additional stress on socioeconomic and physical systems. A further demographic response will come about through the risk of extreme events on human settlements. If the incidence and magnitudes of events such as droughts and coastal floods increase there could be large scale demographic responses for example through migration. (IPCC Working Group 2, 2007)

**Research Handbook on Climate Change, Migration and the Law (Introduction).** Benoit Mayer, 2019. This Handbook seeks to provide an overview of the myriad of ideas and debates that emerged in recent years on climate change migration and the law. What is often reduced to the simple terms such as climate migration or climate refugees emerged as a rather complex theme. Climate change affects human mobility in multiple ways often indirectly and always within the context of particular societies and communities. It is not always possible to identify specific scenarios of climate migration and a fortiori to single out climate migrants. In turn these conceptual intricacies make it more difficult to analyse how existing law applies to and how new laws and policies could relate to what should perhaps best be called the climate migration nexus. As editors we were committed to giving voice to different views even if those could be conflicting rather than pushing for a particular narrative of our taste. We thus leave it to the readers to weigh multiple arguments through further research. Thus the chapters gathered in this Handbook are written by authors from different backgrounds and perspectives to reflect the multiple ongoing discussions on the topic. These chapters develop diverse and sometimes conflicting understandings of among others the

implications of climate change for human mobility terminological choices and views about desirable steps to be taken This introduction provides a general background to the chapters that follow A first section discusses some difficulties in conceptualizing the climate migration nexus A second section offers a broad overview of relevant legal developments A third section examines the political and normative implications of discussions on the climate migration nexus A fourth section presents the outlines of this Handbook

*Environmental Migration and Social Inequality* Robert McLeman, Jeanette Schade, Thomas Faist, 2015-12-16 This book presents contributions from leading international scholars on how environmental migration is both a cause and an outcome of social and economic inequality It describes recent theoretical methodological empirical and legal developments in the dynamic field of environmental migration research and includes original research on environmental migration in Bangladesh Burkina Faso China Ghana Haiti Mexico and Turkey The authors consider the implications of sea level rise for small island states and discuss translocality gender relations social remittances and other concepts important for understanding how vulnerability to environmental change leads to mobility migration and the creation of immobile trapped populations Reflecting leading edge developments this book appeals to advanced undergraduate and graduate students researchers and policymakers

Negotiating Migration in the Context of Climate Change NASH., Sarah Louise Nash, Assessing migration in the context of climate change Nash draws on empirical research to offer a unique analysis of policy making in the field This detailed account is a vital step in understanding the links between global discourses on human mobilities climate change and specific policy responses

Migration, Environment and Climate Change Frank Laczko, Christine Aghazarm, 2009 Gradual and sudden environmental changes are resulting in substantial human movement and displacement and the scale of such flows both internal and cross border is expected to rise with unprecedented impacts on lives and livelihoods Despite the potential challenge there has been a lack of strategic thinking about this policy area partly due to a lack of data and empirical research on this topic Adequately planning for and managing environmentally induced migration will be critical for human security The papers in this volume were first presented at the Research Workshop on Migration and the Environment Developing a Global Research Agenda held in Munich Germany in April 2008 One of the key objectives on the Munich workshop was to address the need for more sound empirical research and identify priority areas of research for policy makers in the field of migration and the environment
