**Disinventing and Reconstituting Languages** Sinfree Makoni, Alastair Pennycook, 2007 This book questions assumptions about the nature of language Looking at diverse contexts from sign languages in Indonesia to literacy practices in Brazil the authors argue that unless we change and reconstitute the ways in which languages are taught and conceptualized language studies will not be able to improve the social welfare of language users The Routledge Handbook of Language and Superdiversity Angela Creese, Adrian Blackledge, 2018-02-21 The Routledge Handbook of Language and Superdiversity provides an accessible and authoritative overview of this growing area the linguistic analysis of interaction in superdiverse cities Developed as a descriptive term to account for the increasingly stratified processes and effects of migration in Western Europe superdiversity has the potential to contribute to an enhanced understanding of mobility complexity and change with theoretical practical global and methodological reach With seven sections edited by leading names the handbook includes 35 state of the art chapters from international authorities The handbook adopts a truly interdisciplinary approach covering Cultural heritage Sport Law Education Business and entrepreneurship The result is a truly comprehensive account of how people live work and communicate in superdiverse spaces This volume is key reading for all those engaged in the study and research of Language and Superdiversity within Applied Linguistics Linguistic Anthropology and related areas

**Multilingualism and Multimodality** Ingrid de Saint-Georges, Jean-Jacques Weber, 2013-09-03 In the social sciences and humanities researchers often qualify the period in which we are living as late modern post modern or superdiverse These terms seek to capture changing conditions and priorities brought about by a new social order This social order is characterized among other traits by an increased visibility of social cultural and linguistic diversity arising out of unprecedented migration and mobility patterns It is also associated with the development of information and communication technologies which in the digital era transform communication patterns identities relationships and possibilities for action For education these late modern conditions create numerous interesting challenges given that they are of course reflected in the classroom and other sites of learning Conditions of superdiversity mean that in educational institutions varied practices

linguistic repertoires and symbolic resources come into contact posing questions about how institutions and actors choose to deal with this diversity Likewise digital technologies with their possibilities for assembling and using multimodal texts in new ways transform the learning experience redefining what counts as teaching learning knowledge or assessment By providing careful analyses of policies and interactions in superdiverse technologically complex educational contexts the authors of this volume contribute something important they give a shape a semiotic form to some of the issues raised by transnational migration sociocultural diversity and digital complexity They construct a framework for reflecting about the new social order and its impact on education They also reveal the kinds of new questions and new terrains that can and must be explored by linguistic research if it wants to stay relevant for education in these times of change

**Heteroglossia as Practice and Pedagogy** Adrian Blackledge, Angela Creese, 2013-12-17 This volume presents evidence about how we understand communication in changing times and proposes that such understandings may contribute to the development of pedagogy for teaching and learning It expands current debates on multilingualism asking which signs are in use and in action and what are their social political and historical implications The volume's starting point is Bakhtin's heteroglossia a key concept in understanding the tensions conflicts and multiple voices within among and between those signs The chapters provide illuminating accounts of language practices as they bring into play both in practice and in pedagogy voices which index students localities social histories circumstances and identities The book documents the performance of linguistic repertoires in an era of profound social change caused by the shifting nature of nation states increased movement of people across territories and growing digital communication Our thinking on language and multilingualism is expanding rapidly Up until recently we have tended to regard languages as bounded entities and multilingualism has been understood as knowing more than one language Working with the concept of heteroglossia researchers are developing alternative perspectives that treat languages as sets of resources for expressing meaning that

can be drawn on by speakers in communicatively productive ways in different contexts These perspectives raise fundamental questions about the myriad of ways of knowing and using language s This collection brings together the contributions of many of the key researchers in the field It will provide an authoritative reference point for contemporary interpretations of heteroglossia and valuable accounts of how translanguaging can be explored and exploited in the fields of education and cultural studies Professor Constant Leung King s College London UK From rap and hip hop to taxi cabs and from classrooms to interactive online learning environments each of the chapters in this volume written by well known and up and coming scholars provide fascinating accounts drawing on a wide diversity of rich descriptive data collected in heteroglossic contexts around the globe Creese and Blackledge have brought together a compelling collection that builds upon and expands Bakhtin s construct of heteroglossia These scholars help to move the field away from the view of languages as separate bounded system by providing detailed examples and expert analyses of the ways bilinguals and multilinguals draw upon their linguistic repertoires for effective and meaningful communication Wayne E Wright University of Texas at San Antonio USA
