*Did you know?  
Fire drills are required  
annually for occupied facilities.*

*This guide was developed to  
assist facility managers and  
unit personnel in developing  
fire drill procedures.*

*The purpose of a fire drill is to familiarize and re-enforce proper evacuation routes and practices. The goal is to have the proper actions be an automatic response whenever fire alarms sound, so that everyone safely evacuates the area in an orderly manner. Fire drills are required annually for most facilities, and should be used to evaluate warning features and occupant knowledge.*

## General Requirements

In accordance with JBERI 32-2001, *Fire Prevention Program*, all occupied facilities must have at least one documented fire drill per year. All facility fire alarm systems are tested annually by the 773 CES Alarm Shop and this would be an ideal time to perform and document your fire drill. Here are some helpful tips to help you carry out this requirement:

- **DO NOT** pull any alarms without first notifying the Fire Prevention Office or having the alarm shop present, otherwise it will generate a fire department response.
- Make sure to follow the directions on the Fire Drill Sheet correctly and record the evacuation time and number of personnel who participated in the drill.
- Always have the most recent Fire Drill Sheet available in your fire prevention folder along with the facility fire inspection reports.
- Be sure to vary the scenarios and rooms/occupants tested during evacuation drills to prevent complacency.
- The Fire Prevention Office is available to assist you with your drill, can activate your alarm system, and provide feedback on response actions.
