Fullerene Collision Reactions E.E. Campbell, 2006-04-11 Fullerene Collision Reactions provides a comprehensive overview of the state of the art of fullerene collision studies The book begins with introductory chapters that provide the necessary background in experimental and theoretical techniques This is followed by experimental results and theoretical calculations covering the wide range of available gas phase fullerene collision experiments Emphasis is placed on gas phase molecular beam experiments where reaction fragmentation and charge transfer cross sections have been determined covering collision energy ranges from thermal to MeV Atomic ionic electronic cluster and surface collisions involving fullerenes are covered in depth accompanied by a clear presentation of the most commonly applied experimental and theoretical techniques This book will be an invaluable resource for senior undergraduate students graduate students and researchers working in the field

Periodic Nanostructures Mircea V. Diudea, Csaba L. Nagy, 2007-08-23 These tiny structures could offer architectural designs for the cities of the future The authors explore the foam like carbon structures which relate to schwarzites and which are infinite periodic minimal surfaces of negative curvature They show that the periodicity of close repeat units of such structures is evident not only in these formations but also in all of the carbon allotropes The text provides literature and data on the field of nanostructure periodicity and the authors own results on nanostructure building and energy calculations

Latest Advances In Atomic Clusters Collisions: Fission, Fusion, Electron, Ion And Photon Impact Jean-patrick Connerade, Andrey Solov'yov, 2004-11-24 This comprehensive volume surveys the general aspects of atomic cluster science and outlines some of its important new challenges It begins by detailing the recent advances in the understanding of structure and the essential properties of selected atomic cluster systems fullerenes and confined atoms Recent advances in the field of photo processes involving atomic clusters and fullerenes are discussed and an entire chapter is devoted to the problem of fission dynamics of atomic clusters presenting parallels with similar processes in

nuclear physics The book goes on to describe the problems of electron cluster collisions with special emphasis on polarization and collective excitation effects The important area of the behavior of atomic clusters in laser fields is considered the ionization collective dynamics of electrons in the system in the presence of the laser field and the laser induced dynamics of molecules and clusters are thoroughly described Finally a broad spectrum of problems in the area of ionic collisions with fullerenes and metal clusters is covered from both experimental and theoretical points of view and the results of the most recent measurements are reported The concluding chapter takes a careful look at the interaction of an atomic cluster with a surface The problems of cluster deposition and formation at a surface as well as collision processes involving clusters deposited at a surface are considered through a number of illustrative examples a

Physics & Chemistry of Fullerenes Peter W. Stephens,1993 The creation of the hollow carbon buckminsterfullerene molecule as well as methods to produce and purify bulk quantities of it has triggered an explosive growth of research in the field Superconducting and magnetic fullerides atoms trapped inside the fullerene cage chemically bonded fullerene complexes and nanometer scale helical carbon tubes are some of the leading areas that have generated much excitement This book is intended as a guide to the literature for the scientist who is just entering fullerene research and will be one more valuable volume to the collection for the established worker It contains reprints of some sixty most important research papers with focus especially on those papers that have guided further work in the field There is also a short review of the field with references to many other publications
